UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:
Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Stations)
E...( )	4...( )	E...( )		Tactical or as required
			4...118.1	International airdrome control towers
F...( )	5...( )	F...( )		Tactical or as required
			5...143.28	General Communications
G...137.70	6...143.64	G...142.02	6...143.64	GCA
H...134.1	7...142.02	H...134.64	7...142.02	GCA
	8...134.64		8...134.1	GCA
	9...126.18		9...126.18	Control towers
Guard.... 121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

✓ Indicates new or revised Special Notices

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec. 1, 1949, Location Identifiers, Third Edition, Sept. 15, 1948, with 17 supplements

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept. 1 1948, with two revisions.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan. 24, 1950; Teletype Maps: M-10, Jan 1, 1949; M-11, Dec. 1, 1949; M-13, June 15, 1948, and M-14, July 1, 1948.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

✓USAF Official Instrument Approach Procedure Publication: Effective July 1, 1950, the new Pilot's Handbook, "East and West" became the only official publication of instrument approach procedures for the United States. For clearance purposes under AFR 60-16, paragraphs 37, b (2) only the East or West Pilot's Handbook is applicable. The old Pilot's Handbooks in four volumes are no longer revised or usable and should be returned to the Aeronautical Chart Service.

✓CHANGES FOR PILOT'S HANDBOOK (EAST): (1) AL 171. Goshen, Ind. Change initial apch alt to E crs 2100' from int NW crs FWA Rng; S crs 2100' from int NE crs Lafayette rng. Low cone: 1500'.

(2) AL 188. Middletown, Pa., Olmsted AFB. Procedure turn: S side W crs 2400' within 10 mi, 3000' within 15 mi, 3500' within 25 mi. Low cone: 1800'. Ceiling: 1300'. Missed apch procedure: If contact not established within 6.4 mi after passing rng stn, climb to 2000' on a heading of 113°.

(3) Pensacola Mun, Fla. Missed apch procedure: If contact not established within 2.1 mi after passing rng stn, climb to 1300' on N crs.

(4) Raleigh-Durham, N. C. Change initial apch alt to NE crs 1800' from int SE crs Blackstone.

(5) Rochester, Minn. Change initial apch alt to W crs 2400' Ellendale Int.

(6) Tallahassee (Dale Mabry Fld), Fla. Procedure turn: S side NW crs, 1300' within 20 mi, 1400' within 25 mi.

(7) Toledo, Ohio. Elev: 622'. Min alt over Aerodrome 1122'.

(8) Williamsport Mun, Pa. Change initial apch alt to S crs 3500' from Selinsgrove Rbn. Missed apch procedure: If visual contact not established within 2.0 mi after passing rng stn, climb to 3600' on E crs.

(9) Augusta (State), Me. Change initial apch alt to NE crs 1600' from int SW crs BGR rng SW crs 1800' from PWM rng. Procedure turn: S side SW crs 1800' within 25 mi. Missed apch procedure: If contact not established within 2.0 mi after passing rng stn, climb to 1600' on NE crs.

(10) Bowling Green, Warren Co., Ky. Procedure turn: N side of SE crs 1900' within 10 mi, 2200' within 15, 20 and 25 mi.

(11) Bridgeport, Conn. Change initial apch alt to NE crs 1200' int NE crs HEM rng.

(12) Cross City, Fla. Change initial apch alt to NE crs 1200' int W crs Jacksonville.

(13) Dayton, Ohio. Change initial apch alt to W crs 2300' frim int E crs IND rng, 1700' from Verona FM (Final). Low cone: 1700'.

(14) Detroit, Wayne-Major, Mich. Change initial apch alt to N crs 2000' from int E crs Lansing.

(15) Fallon, Nev. Change procedure turn to: N side NE crs, 6500' within 10 mi; 7000' within 15 mi; 11,000' within 25 mi.

(16) Florence, S. C. Change initial apch altitude to NE crs 1400' Lumberton Int; SE crs min enroute alt; 1200' from int NW crs MYR VAR rng; SW crs 1500' from E crs CAE rng.

(17) Greenville, S. C. Min alt over aerodrome: 1549'. Ceiling over aerodrome: 500'.

(18) Greenwood, Miss. Change procedure turn: N side E crs 1600' within 25 mi. Low cone: 1100'.

(19) Indianapolis-Stout Fld, Ind. Change initial apch alt to E crs 2300' from int NW crs CIN rng; W crs 2000' from HUF rng; 1500' from Clayton FM (Final). Delete shuttle on E and W crss. Missed apch procedure: If contact not established within 6.0 mi after passing rng stn, climb to 2300' on E crs.

(20) Knoxville-McGhee Tyson Arpt, Tenn. Change initial apch alt to N crs min enroute alt, 2000' from Inskip FM (Final). Missed apch procedure: If visual contact not established within 2.8 mi after passing rng stn, climb to 4000' on W crs within 25 mi.

(21) Louisville-Standiford, Ky. Change initial apch alt to E crs 2400' from N crs LEX rng (VAR); 1500' from Eastwood FM (Final). Procedure turn: S side E crs; 2000' within 10 mi; 2400' within 25 mi. Low cone: 1500'.

(22) Meridian-Key Fld, Miss. Missed apch procedure: If contact not established within 2.8 mi after passing rng stn climb to 2000' on SE crs.

(23) Miami Int'l, Fla. Change initial apch alt to W crs 1100' from int SE crs FMY rng; 600' from Krome FM (final). Low cone: 600'.

(24) Milwaukee-General Mitchell, Wisc. Change initial apch alt to S crs 2100' from int E crs RFD rng; 2000' Kenosha FM; 1400' Franksville FM (Final). Procedure turn: E side S crs; 1900' within 20 mi; 2000' within 25 mi.

(25) Muskegon Co., Mich. Procedure turn: E side SE crs; 1800' within 25 mi.

(26) Otis AFB, Falmouth, Mass. ADF procedure has been approved utilizing Otis H fac, 269 kc. Ident: AUA. Initial apch from Providence rdo rng stn out E crs at 2000'. Shuttle: NW of homer crss 320 and 140° at min alt 3000'. Final apch crs: 230°. Procedure turn: to left after 1 min from homer within 10 miles: 1200'. Alt over homing fac on final apch: 615'. Distance, H fac to arpt: 0 mi. If lndg not accomplished or gnd ctc not established within .5 mi after passing H fac, proceed out 270° crs, climbing to 2000' H fac opers on req and automatically upon receipt of IFR clearance. Otis ctl twr must be called as soon as ctc can be made, requesting operation of H fac.

✓CHANGES FOR PILOT'S HANDBOOK (WEST): (1) Alice Mun., Texas. Missed apch procedure: If visual ctc not established within 3.6 mi after passing Alice rng stn, climb to 1500' on E crs.

(2) Alexandria, Minn. Change bearing and dist. stn to fld: 172°, 1.9 mi.

(3) Gage, Okla. Change initial apch alt to NE crs 3600' from Wichita rng; SW crs 4500' from int E crs Amarillo; NW crs 4000' from int S crs Garden City. Missed apch procedure: If visual ctc not established within 2.0 mi after passing rng stn, climb to 4500' on SW crs.

(4) Hobbs-Lea Co. Arpt, N. Mex. Change intial apch alt to N crs 5500' from int W crs Lubbock rng; E crs 5000' from int S crs Lubbock rng; W crs 5500' from int SE crs ROW rng. Min alt over aerodrome: 4259'. Ceiling over aerodrome: 600'.

(5) Houston, Texas. Change initial apch alt to: SW crs 1500' from Palacios rng, 1200' from Arcola FM; NW crs 1600' from Bryan rng; 1300' from Houston FM. Procedure turn: E side SE crs 1100' within 25 mi. Missed apch procedure: If visual ctc not established within 2.2 mi after passing rng stn, or if lndg not accomplished, climb to 1600' on NW crs.

(6) Jamestown, N. Dak. Change initial apch alt to S crs 2800' Aberdeen rng.

(7) Long Beach, Calif. Change initial apch alt to SE crs 4000' from int N crs SAN rng; 1000' from Huntington Beach FM (Final). Procedure turn: W side SE crs 1500' within 15 mi.

(8) Minot-Port O'Minot, N. Dak. Missed apch procedure: If visual ctc not established within 3.1 mi after passing rng, or if lndg not accomplished, climb to 3500' on NW crs.

(9) Connally AFB, Waco, Texas. Change initial apch alt to SE - 2000' from Bryan rng.

(10) Ellington AFB, Texas. Change initial apch alt to SE - 1300' Galveston rdo rng; SW - 1500' Palacios rng stn; 1200' Arcola FM; NW - 1600' Bryan rdo rng; 1300' Houston FM (Final).

(11) Goodfellow AFB, San Angelo, Texas. Change initial apch alt to E crs 3500' from int S crs Abilene; S crs 3500' from int NW crs Junction VAR.

(12) Castle AFB, Calif. Following instrument apch procedure has been authorized for use utilizing new rdo rng, ident: MER, lctd 37-19-52N, 120-31-01W, with courses aligned at 33-123-213-303. Initial apch alts: NE - Min enroute alt. SE - 3000' (FNO rng stn). SW - min enroute alt. NW - 3000' (SAC rng stn). Shuttle: 3000' on SW crs within 25 mi. Final apch crs: SE. Procedure turn: W side of SE crs within 25 mi at min alt of 2000'. Low cone: 1200'. Bearing and distance, stn to fld: 303°, 3.3 mi. Min alt over arpt: 685'. Missed apch procedure: Proceed out NW crs, climbing to 3000'.

(13) AL 429. Tucson, Arizona, Davis Monthan AFB. Correct missed apch procedure to read: "Climb to 7000' on NW crs within 25 mi or when directed by ATC climb to 7200' on SW crs within 25 mi.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Coprs aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in, or over, Canadian territory.

COMPASS LOCATOR SYMBOLS: To conform with ICAO standards the letter "L" is now in use as the abbreviation denoting a compass locator. This replaces the "CL" or "K" as used in the past on charts or in the Airman's Guide. "OMK" now becomes "LOM"; "MMK" now becomes "LMM"; "IMK" becomes "LIM".

The abbreviation "L" as used in the Airman's Guide indicated L/MF voice facility on other than range frequency. This now becomes "J"

See Radio Class Designations, Page VI.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

AIRPORTS NOT TYPED AS "A" OR "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment or lease thereon. Those prefixed by (N) have a Navy (Air) servicing detachment or lease thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

N.B. Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400 feet and 1 mile respectively are mandatory, except in emergency.

THE FOLLOWING BEACON SITES WILL BE DISCONTINUED JULY 31, 1950:

ATL-LGA	SITE
Blackstone, Va.	42
Riverdale, Md.	57A
Glenburnie, Md.	58
BNA-DCA	
Pine Ridge, Va.	33A
Dublin, Va.	35B
BUF-LGA	
Castile, N. Y.	4
CHI-LGA	
Clarksville, Pa.	38
Clintonville, Pa.	41
Knox, Pa.	43A
Reynoldsville, Pa.	46
Clearfield, Pa.	49A
Millheim, Pa.	54A

CLE-ALB	SITE
Ebenezer, N. Y.	18
Akron, N. Y.	20
Batavia, N. Y.	21B
Chili, N. Y.	23

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 kc: All CAA airway communications stations other than those listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

Acomita, N.M.	Hayes Center, Neb.	Rock Springs, Wyo.
Akron, Colo.	Hutchinson, Kans.	Salina, Kans.
Battle Mt., Nev.	Joliet, Ill.	Santa Fe, N.M.
Butler, Mo.	Kirksville, Mo.	Sidney, Neb.
Columbia, Mo.	Lafayette, Ind.	Springfield, Ill.
Dalhart, Texas	Lafayette, La.	Springfield, Mo.
Dodge City, Kans.	Laramie, Wyo.	Sinclair, Wyo.
Dyersburg, Tenn.	Las Vegas, N.M.	Terre Haute, Ind.
Eagle, Colo.	Lebo, Kans.	Texarkana, Ark.
Effingham, Ill.	Loveloch., Nevada	Tucumcari, N.M.
El Dorado, Ark.	Malden, Mo.	Vichy, Mo.
Elko, Nev.	Mansfield, Ohio	Russell, Kans. (Waldo)
Farmington, Mo.	Moline, Ill.	Walnut Ridge, Ark.
Ft. Bridger, Wyo.	Monroe, La.	Wendover, Utah
Gage, Okla.	Needles, Calif.	Wilkes-Barre, Pa.
Garden City, Kans.	North Platte, Neb.	Williamsport, Pa.
Galveston, Texas	Otto, N.M.	Winslow, Ariz.
Grand Island, Neb.	Paducah, Ky.	Worcester, Mass.
Grand Junction, Colo.	Parkersburg, W. Va.	Zanesville, Ohio
Greenwood, Miss.	Prescott, Ariz.	Zuni, N.M.

✓INSTRUMENT APPROACH PROCEDURES: Cincinnati, Ohio: The Lunken Field low frequency range procedure, cancelled on May 8, 1950, has been reapproved, effective June 30, 1950.

✓ON-REQUEST REPORTING POINT: Effective immediately the De Soto on-request reporting point intxn is changed to the intxn of the S crs of St. Joseph, Mo., and the SW crs Kansas City, Mo.

✓CORRECTIONS TO AIRMAN'S GUIDE VOL. 5, No. 8, DATED JULY 3, 1950:

(1) Page 59. Change Red Airway No. 12 to read: ...the intxn of the SE crs of Lansing, Mich. and the W crs of Detroit, Mich. rng instead of ....Detroit, Mich. rng.

(2) Page 50. Change Gulkana, Alaska control zone from a 3 mile radius to 25 mile radius of Gulkana Arpt.

(3) Page 60. Correct WAC chart 408, dated Feb. 2, 1950, by changing freq of Jackson, Tenn. rng to 332 kc.

✓CORRECTIONS TO AERONAUTICAL CHARTS: (1) Correct Des Moines sectional chart dated May 5, 1950, by showing the N sector on the N and the A sector on the S of the NE aural crs of the Ottumwa, Iowa VAR.

(2) Correct chart 22DF by changing the frequency of the Minneapolis, Minn. rng from 226 kc to 266 kc.

(3) Correct Beaumont sectional chart dated Feb. 5, 1950, by deleting airway beacon 13, site 4, HOU-SHV.

✓AMENDMENTS TO PUBLISHED MINIMUM EN ROUTE INSTRUMENT ALTITUDES: Effective August 1, 1950, published minimum en route instrument altitudes will be amended as follows:

	From	To	Min Alt
Green Airway No. 2 is amended to read in part:	Dunham Lake, Mich.	Detroit, Mich.	2200'
Green Airway No. 4 is amended to read in part:	Columbia, Mo.	St. Peters (Int), Mo.	2200'
Green Airway No. 5 is amended to read in part:	Phoenix, Ariz.	Casa Grande (Int), Airz.	5000'
Green Airway No. 8 is amended to eliminate:	Attu, Alaska	Shemya, Alaska	3200'
	Shemya, Alaska	Adak, Alaska	8000'
	*Adak, Alaska (6000' - Min crossing alt at Adak, Northeastbound)	Atka, Alaska	7800'
	Atka, Alaska	North Shore, Alaska	6700'
	North Shore, Alaska	Cape Mordvinoff (Int), Alaska	7700'
	Cape Mordvinoff (Int), Alaska	Cold Bay, Alaska	6900'
Green Airway No. 8 is amended to read in part:	Port Heiden, Alaska	King Salmon, Alaska	1500'
	King Salmon, Alaska	Kekaklek (Int), Alaska	4500'
Amber Airway No. 6 is amended by adding:	Cincinnati, Ohio	W. Jefferson (Int), Ohio	2200'
Red Airway No. 8 is amended by adding:	Int. W. Crs. Wright-Patterson, O. & NW crs Cincinnati, O.	Trotwood (Int), Ohio	2200'
	Trotwood (Int), Ohio (2500' - Min crossing alt at Wright-Patterson, Westbound)	*Wright-Patterson, Ohio	2500'
	Wright-Patterson, O.	Lockbourne (Int), Ohio	2200'
	Lockbourne (Int), O.	Zanesville, Ohio (Rbn)	2200'
	Zanesville, Ohio (Rbn)	Bergholz, Ohio (Rbn)	2500'
	Bergholz, Ohio (Rbn)	Butler, Pa. (Rbn)	2500'
Red Airway No. 9 is amended to read in part:	Phoenix, Ariz. (VAR)	Cactus (Int), Ariz.	5000'
	*Cactus (Int), Ariz. (6000' - Min crossing alt at Cactus (Int), Northeastbound)	Winslow, Ariz. (VAR)	10,000'
Red Airway No. 15 is amended to read in part:	Prescott, Ariz. (6000' - Min crossing alt at Cactus (Int), Northbound)	*Cactus (Int), Ariz.	10,000'
	Cactus (Int), Ariz.	Phoenix, Ariz.	5000'
Red Airway No. 17 is amended by adding:	McKeesport, Pa. (Rbn)	Johnstown, Pa. (Rbn)	4500'
Red Airway No. 40 is amended to eliminate:	Shemya, Alaska	Amchitka, Alaska	5000'
	Amchitka, Alaska	Chunu (Int), Alaksa	3000'
	Chunu (Int), Alaska (6600' - Min crossing alt at Adak, Northeastbound)	*Adak, Alaska	4900'
Red Airway No. 46 is amended to read in part:	Ellendale (Int), Minn.	Rochester, Minn.	2400'
Red Airway No. 58 is amended to read in part:	Salinas, Calif. (VAR)	Int. NE crs Salinas, Calif. (VAR) & NW crs Fresno, Calif.	6000'
Red Airway No. 61 is amended by adding:	Butler, Pa. (Rbn)	Johnstown, Pa. (Rbn)	4500'
Red Airway No. 74 is amended by adding:	Loveland (Int), Ohio (2500' - Min crossing alt at Wright-Patterson, Southwestbound)	*Wright-Patterson, Ohio	2500'
	Wright-Patterson, Ohio	Springfield (Int), Ohio	2200'
Red Airway No. 81 is amended by adding:	Columbus, Ohio	Parkersburg, W. Va. (VAR)	2200'
Red Airway No. 93 is added to read:	Lincoln, Neb.	Glenwood (Int), Iowa	2500'
Blue Airway No. 3 is amended to read in part:	Maxwell, Ala.	Eden (Int), Ala.	3000'

✓**TEMPORARY AMENDMENT TO MINIMUM EN ROUTE INSTRUMENT ALTITUDES:**

The following amendments will be effective from 0001 EST August 12, 1950 to 0001 EST August 29, 1950. At the end of that period the altitudes as designated prior to this temporary amendment will again become effective.

	From	To	
Green Airway No. 5 is amended to read in part:	Hartley (Int), Md.	Millville, N. J.	3000'
Red Airway No. 77 is amended to read in part:	Int. SE crs Dover, Del. (VAR) and the center line of Red Airway No. 77.	Millville, N. J.	3000'

✓**AMENDMENTS TO CIVIL AIRWAYS:** The following amendments will be effective from 0001 EST August 12, 1950 to 0001 EST August 29, 1950. At the end of that period Green civil airway No. 5 and Red civil airway No. 77 will again become effective as designated prior to this temporary amendment.

(1) Green Airway No: 5 (Los Angeles, Calif., to Boston, Mass.) is amended to exclude the portion below 2000' which lies within the Little Creek, Del., danger area.

(2) Red Airway No. 77 (Lynchburg, Va., to Millville, N. J.) is amended to exclude the portion below 2000' which lies within the Little Creek, Del., danger area.

✓**OMNIRANGE USE:** The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

MANASSAS ARPT: Framework **SE side NE/SW Strip, SW side NNW/SSE Strip.** (3-14)

MOUNT VERNON: See special **notice under District of Columbia.**

NEWPORT NEWS-PATRICK **HENRY ARPT:** Grass areas soft, unsafe. Use only hard surfaces for lndgs and taxying. **Parking in designated areas only.** (6-2)

NORFOLK-GLENROCK ARPT: **Use grass areas only. Strips being paved.** (5-11)

NORFOLK NAS (CHAMBERS **FLD):** Avail for lcl daylgt figt opers only. (2-15)

PULASKI-RADIO: Omnirng **alt radials 30° to 55°, 200° to 220°, 325° to 345°** usable dist 40 mi; 345° to 30°, 25 mi. **(6-30)**

RICHMOND-BYRD ARPT: **Grass area unsafe for taxying or parking.** (5-18)

RICHMOND-NORTHFIELD ARPT: **Rnwys 6-24 and 8-26 clsd** (const). Equip on fld. Rnwy 18-36 usable with **ctn.** (5-16)

ROANOKE-RADIO: **LF rng on 371 kc gnd-checked only.** (6-7)

WAYNESBORO ARPT: **NW/SE Strip clsd. Use NE/SW Strip only. Equip on fld intermit**tently. (5-16)

WASHINGTON: SPECIAL **NOTICE: Unmrkd p-lines across coves in Puget Sound area and** lakes. (1-12)

BELLINGHAM-RADIO: **VHF omnirng 294° radial, which lies over Vancouver, B. C., has** a usable dist of 20 mi **acct course roughness at the lowest instrument alt of 1500' MSL.** (1-6) Radial 40° **usable distance 35 mi; 225° radial usable distance 40 mi.** (6-24)

BELLINGHAM ARPT: **Pilots of unscheduled and scheduled acft using this fld as an** alternate must register **at CAA Comms Bldg.** (6-8)

CHELAN ARPT: Gun Club **lctd 500' W of N/S Strip. Both strips in line of fire.** (4-27)

ELLENSBURG-RADIO: Omnirng **radials 42°, 157° usable 30 mi; 52°, 45 mi.** (3-3)

EVERETT-SNOHOMISH RIVER BOOM **SEAPLANE BASE: (New Base). Lctd: 1.2 mi E on Snohomish River. Lat 47-59-00, long. 122-10-30. **Elev: SL. 2 lndg lanes, lngst 3600'.** PRIVATE. Ramp, mar. rlwys, float, crash boat. **Ctn-floating logs. P-lines WSW.** (5-18)

KENT ARPT: Main grass strip clsd, mrkd. **Use mrkd gravel strip E side of fld.** (5-9)

LIND ARPT: Bcn inop. (7-6)

McCHORD AFB (TACOMA)-RADIO: USAF rng is unreliable. (6-1)

METALINE FALLS-SULLIVAN LAKE U.S.F.S. ARPT: Circle fld to stop auto tfc. (1-26)

MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., NAS Whidbey Island. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-15)

SEATTLE-BOEING FLD: Gravel taxiway 4 abandoned. New taxiway 4 and taxiway C to loading ramp is now open. (7-11) All daylgt VFR opers of lgt acft confined to strip E **of** main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (7-11)

SEATTLE NAS-TOWER: Navy GCA inop. (6-21) FLD: Acft in tfc are rstd from figt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 **lgtd 30 min prior to arrivals between sunset and sunrise and on req.** (1-16)

WASHINGTON: SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: May 17, 1950, CAA lclzr and glide path shut down until approx Nov 15 during rnwy construction. LMM, LOM and lgt lane will remain in oper. (5-17) FLD: Two 70' unlgtd poles being erected 1200' E of ILS lclzr bldg. (6-22)

SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (5-12) 1800' ext NE end 4490' rnwy. (11-8)

SPOKANE-GEIGER FLD: Five 60' obst lgtd antenna poles lctd 300 yds S of apch end Rnwy 20. Equip on fld. (6-8)

TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Obst lgts on supporting twrs. (7-10)

TACOMA ARPK: Tfc crossing 2800' N of S end. (4-18)

WALLA WALLA-CITY-CO. ARPT: Const on fld days. Rnwy 7-25 clsd ngts. (6-25)

WENATCHEE: Unmrkd p-line crosses Columbia River 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above river surface. (2-13)

WHIDBEY ISLAND NAS (OAK HARBOR): Ctn, use center of rnwys. Covered drainage ditches on sides of both rnwys not safe for lndg or braking action. (2-15)

YAKIMA-RADIO: Omnirng radials 176° usable 35 mi; 336°,123°, 40 mi; 321°, 38 mi. (3-3)

WEST VIRGINIA: ★CHARLESTON-KANAWHA CO. ARPT-TOWER: July 17, 1950, CAA twr comm with apch ctl fac. Transmitting: 317 kc, 120.7,121.5,126.18 mc; rcvg: 3105,4495 kc, 120.7,121.5,126.18,122.5 mc. Transmitting and rcvg on 121.9 mc for ctl gnd vic. Hrs of oper: cont. Class: AC(g). (7-17) These data rcvd too late for inclusion on ANRA Page. CAA ILS LMM figt-checked, oper normal. LOM on 245 kc, ident: "CH" operg test purposes only. (7-17) FLD: Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd day, ngt. Hazard bcns lctd each end Rnwy 14-32 opers on test basis. (7-17)

★CLARKSBURG-RADIO: Correct lctn HW fac: lat 39-17-24, long. 80-13-48. (7-12)

ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)

PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (6-23)

WHEELING-OHIO-CO. ARPT: Turf area clsd (const). ILS const along NE/SW Rnwy, mrkd. Equip on fld days. Use rnwys, taxiways only. (5-25)

WISCONSIN: CLINTONVILLE ARPT: Strip 14-32 clsd (const). Strip 4-22 clsd from intsxn to SW end. Strip 9-27 clsd from intsxn to W end. No lgtg avail. (6-26)

LA CROSSE-RADIO: Omnirng radials unreliable in area bounded by 314° and 331° radials between 20 and 30 mi from rng. (5-8)

MADISON ARPT: Numerous cable trenches along all rnwys and extreme ends of Rnwys 4-22 and 13-31. Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. Poles not dismantled, obst lgtd. (7-6)

MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 9-27 perm clsd. (1-12) No NG svcg July 21 to Aug 6. (7-11)

MILWAUKEE-MAITLAND ARPT: Taxi with ctn. Equip on or near taxiway. (5-12)

MILWAUKEE SEAPLANE BASE: Clsd ngts. Ramp under const. Fuel F3. (6-19)

WAUSAU-ALEXANDER ARPT: Clsd to trans acft (const). (5-26)

WAUTOMA ARPT: Apch clearing not completed. (1-20)

WYOMING: AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (6-30)

CASPER-RADIO: Omnirng radials between 10° and 35° from stn not usable at min inst alt beyond 35 mi dist. (7-14)

COWLEY ARPT: Ctn - newly graded. (5-12)

GILLETTE ARPT: Ctn - const. Survey stakes W portion of fld. (3-6)

LARAMIE-RADIO: LF rng course monitor device decomm. (6-1)

**MORAN-FORMER SIGNAL MTN ARPT: ABANDONED. (7-3)

MOORCROFT-RADIO: Soon, omnirng will be comm at lat 44-25-48, long. 104-50-48. Freq: 115.9 mc, ident: MFW. Bear. and dist stn to Gillette Mun Arpt: 249°, 34 mi. Category (1). Var. 15°E. Class: VORW. Elev: 4480' MSL. (6-30)

**PAVILLION ARPT: New fld. Lat 43-15-45, long. 108-42-00. (4-26)

RAWLINS ARPT: Use new ENE/WSW and N/S Strips only. (1-5)

ROCK SPRINGS-RADIO: LF rng course monitoring device inop. (6-1)

SHERIDAN CO. ARPT: N/S Rnwy clsd to acft heavier than DC-3. (1-5) Equip on fld. days. (6-12)

(OVER)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Boston	Norfolk	WAC 262	WAC 359
Jacksonville	Savannah	WAC 309	Boston local
New York	Washington	WAC 310	New York local

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NEW EDITIONS

DROPPED CHARTS

AL 356, 422, 464, 589.
ILS 330.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

(7-18-50)

PACIFIC OCEAN (WEST COAST) AIR DEFENSE AREAS: Effective Date June 1 1950. In the interest of safety, all airmen proposing flight which will approach the West Coast of the United States from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area, between the Canadian - United States Border and the United States - Mexican Border are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Similarly, airmen flying coastwise in the Pacific Ocean Area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flight operations within the continental limits of the United States adjacent to the above described area, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline.

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York, or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

Note: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coastline are not affected by the above.

EASTERN CANADIAN BORDER AIR DEFENSE AREA: Effective Date May 5, 1950. In the interest of safety, all airmen proposing flight which will cross the Canadian Border, southbound, east of the 87th meridian, (Lake Michigan) are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to flight operations within the continental United States adjacent to this area or northbound flights crossing the Canadian Border.

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF LOS ALAMOS REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

SEATTLE-HANFORD AIR DEFENSE AREA: Effective Date May 5, 1950. The United States Air Force has activated an Air Defense Area in the northwest section of the United States. This area is bounded by a line drawn from the coast at North Bend, Oregon to Ontario, Oregon, northeast from Ontario, Oregon to Superior, Montana and from Superior, Montana north to the Canadian Border, thence westward along the Canadian - United States Border to the Pacific Ocean, south along the Pacific Coast to the point of beginning (North Bend, Oregon).

In the interest of safety, all airmen proposing flight which will approach the above described defended area, at any altitude, from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area or across the Canadian - United States Border, southbound, at any altitude, are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility.

Similarly, pilots flying coastwise adjacent to this area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner.

In addition, pilots of aircraft approaching this area from within the continental limits of the United States at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to aircraft operating within the continental limits of the United States, when flying at less than 10,000 feet MSL or 4,000 feet above the immediate terrain, or aircraft operating less tnan 20 nautical miles (23 statute miles) seaward from the coastline.

THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF HANFORD, WASHINGTON REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

WASHINGTON, D. C.
AIRSPACE RESERVATION

EXECUTIVE ORDER OF THE PRESIDENT OF THE UNITED STATES ESTABLISHING AN AIRSPACE RESERVATION OVER PORTIONS OF THE DISTRICT OF COLUMBIA

By virtue of and pursuant to the authority vested in me by section 4 of the Air Commerce Act of 1926, the airspace above the following-described portions of the District of Columbia is hereby reserved and set apart for national defense and other governmental purposes, and for public-safety purposes, as an airspace reservation within which no person shall navigate an aircraft except by special permission of the Administrator of Civil Aeronautics:

1. All that area within the City of Washington, D. C., lying within the following-described boundaries:

Beginning at the SW corner of the Lincoln Memorial Monument (lat. 38°53' 21" N, long. 77°03'02" W); thence N 32° W, 0.6 miles to the Titanic Memorial (identifiable as the intersection of New Hampshire Ave. and Rock Creek and Potomac Parkway, N.W.); thence N 36 1/2° E, 0.6 miles to Washington Circle (identifiable as the intersection of New Hampshire Ave. and K St., N.W.); thence due E along K St., 2.9 miles to the railroad overpass (identifiable as the intersection of K St. with 2nd St., N.E.); thence S 22 1/2° E, 0.7 miles to the SE corner of Stanton Square (identifiable as the intersection of 6th St. and Massachusetts Ave., N.E.); thence S 33 1/2° W, 0.8 miles to the Capitol Power Plant (identifiable as the intersection of New Jersey Ave. and E St., S.E.); thence S 88° W, 1.4 miles to the railroad trestle over the Washington Channel; thence N 66 1/2° W, 1.1 miles to the SW corner of the Lincoln Memorial Monument, the point of beginning.

2. All that area within the City of Washington, D. C., lying within a 1/2 mile radius from the center of the United States Naval Observatory, located at lat. 38° 55'17" N, long. 77°04'02" W.

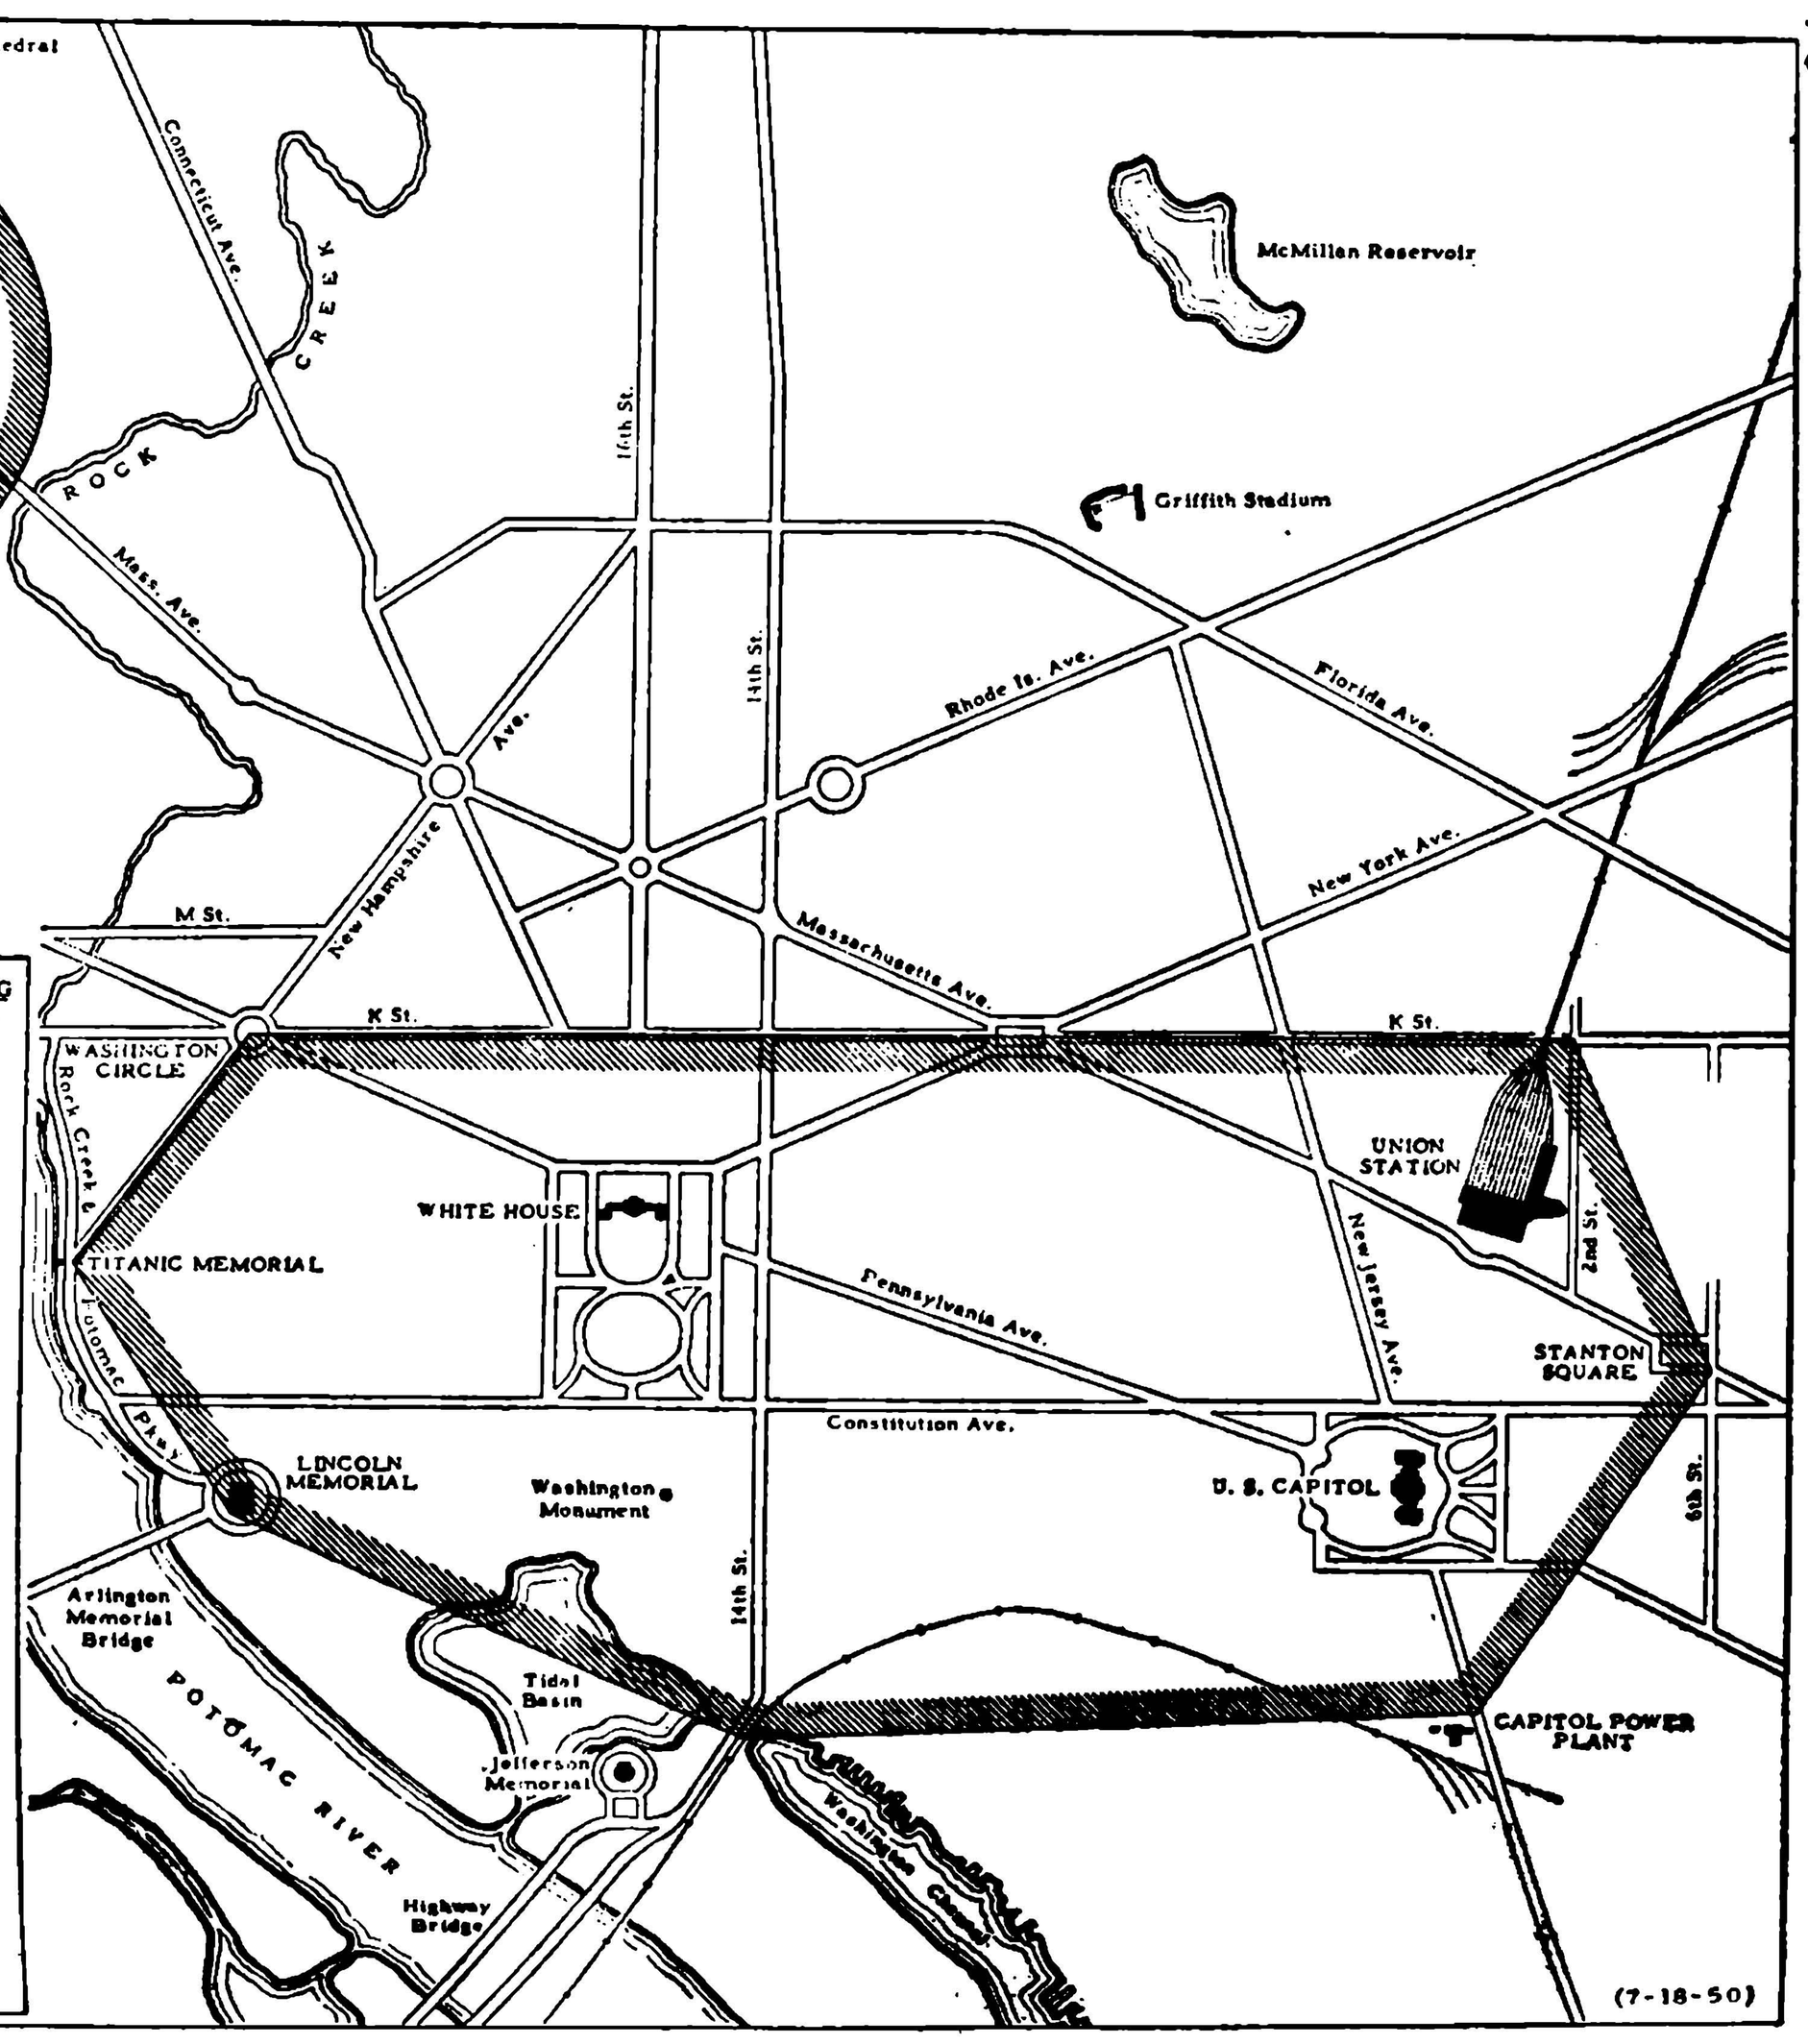
All bearings used in above descriptions are true bearings.

Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938, as amended.

This order supersedes Executive Order No. 8950 of November 26, 1941, establishing an airspace reservation over a portion of the District of Columbia, as amended by Executive Order No. 9153 of April 30, 1942.

Harry S. Truman

This order became effective on May 11, 1950.



AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Arcata, Calif.	DISCONTINUED

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
# = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
* = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.
(D) = Day. (N) = Night.
→ = New or revised data.

(8-1-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC. and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
➔ = New or revised data
◣ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
LMM. . Compass locator station when combined with middle marker of ILS
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. See page 58 for list of CAA INSACs which stand watch on 3117.5 kc.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-U.S. Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-U. S. Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Low intensity runway
- 5 - Low intensity instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIR LINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:
Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Stations)
E...( )	4...( )	E...( )		Tactical or as required
			4...118.1	International airdrome control towers

V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at may VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec. 1, 1949; Location Identifiers, Third Edition, Sept 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept. 1, 1948, with two revisions.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan 24, 1950; Teletype Maps: M-10, Jan 1, 1949; M-11, Dec 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP IV MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

✓NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Hq, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

✓PILOT TO FORECASTER SERVICE: All pilots should note AFR 100-35, dated 3 July 1950, for proper procedures in using the direct pilot to forecaster service.

✓CHANGES FOR USAF PILOT'S HANDBOOK, SPECIAL, JET, US: (1) X-JAL-22, Chanute AFB, Rantoul, Ill. The following procedures replace the one presently published; ceiling and visibility minimums now published apply. Procedure 1. Utilizing Lafayette, Ind. radio rng. Initial approach: 15,000' or above. Obtain clearance thru Chanute Approach Ctl or Airways. Letdown will be on a magnetic heading of 263°. Maintain level flight 1 minute minimum after crossing Lafayette rng. Descend to 2500', reporting at each 5000' level or when VFR. If not VFR at 2500', home Chanute radio, request further instructions from Chanute approach ctl.

Procedure 2: Utilizing Springfield, Ill. rdo rng. Initial apch: Above 15,000'. Obtain clearance thru Chanute apch ctl or airways. Letdown will be on a magnetic heading of 63°. Maintain level flight above 15,000' 2 minute min after crossing Springfield rng. Descend to 2500', reporting at each 5000' level or VFR. If not VFR at 2500', home Chanute radio, request further clearance from apch ctl.

(2) X-JAL-38, July 1949. Rapid City AFB, S. Dak. Initial apch: 15,000' or 500 on top, whichever is lower. Letdown from range will be straight ahead on magnetic heading of 026°. Obtain clearance through Rapid City twr. If not VFR at 6000', make 180° turn to left and home on RAP range. Request GCA.

(3) Jet instrument letdown charts for Hawkins AF Base, Jackson, Miss.; Orlando AF Base, Orlando, Fla.; and Fairfax AF Base, Kansas City, Kans. are cancelled.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-79. Chattanooga (Lovell), Tenn. Change bear. and dist to 203°, 3.2 mi.

(2) AL-274. Montgomery, Ala., Maxwell AFB. Change initial apch alt on N crs to 3000'.

(3) AL-188. Middletown, Pa., Olmsted AFB. Show bearing, stn to fld as 113°. Change apch alt from W to read as follows: 4000' from int S crs PSB rng, 1800' from New Kingstown FM(Final). Change ceiling to: days 1000-1, ngts 1000-2. Change missed apch: if ctc not established within 6.4 mi after passing rng stn, climb to 2000' on E crs.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) Roswell, N. Mex., Walker AFB. Change initial apch alt to the following: NE crs 5500' from int W crs Lubbock; SE crs 5500' from int W crs HOB rng; SW crs 8800' from Clint Rbn; NW crs 12,000' from Albuquerque rng. Shuttle: SE crs to 5500' within 50 mi. Procedure turn: N side SE crs, 5000' within 25 miles. Missed apch procedure: If visual ctc not established at authorized lndg min within 3.5 mi after passing Roswell rng, or if landing not accomplished, make rgt turn to heading of 350° magnetic and climb to 8000'.

(2) Houston, Tex., Ellington AFB. AL-197: Change apch alts from NW to read as follows: 1600' from Bryan rng; 700' from Houston FM (Final).

(3) AL-395. Sioux City, Iowa. LF rng crss realigned as follows: N crs changed to 154°; S crs to 334° magnetic and toward stn. (7-21)

(4) AL-356. Mather AFB, Sacramento, Calif. Rnwy 12-30 perm clsd. (7-18)

(5) AL-368. Goodfellow AFB, San Angelo, Texas. Disregard change published in Airman's Guide Vol 5, No. 9, changing initial apch from E and S. These will remain as previously published until further notice.

(6) AL-115. Lowry AFB, Denver, Colo. Mark procedure with following notation: DO NOT USE BISECTORS 200° OR 290° AS ORIENTATION HEADINGS (MOUNTAINS).

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Coprs aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in, or over, Canadian territory.

COMPASS LOCATOR SYMBOLS: To conform with ICAO standards the letter "L" is now in use as the abbreviation denoting a compass locator. This replaces the "CL" or "K" as used in the past on charts or in the Airman's Guide. "OMK" now becomes "LOM"; "MMK" now becomes "LMM"; "IMK" becomes "LIM".

The abbreviation "L" as used in the Airman's Guide indicated L/MF voice facility on other than range frequency. This now becomes "J".

See Radio Class Designations, Page VI.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

THE FOLLOWING BEACON SITES WILL BE DISCONTINUED JULY 31, 1950:

ATL-LGA	SITE	CLE-ALB	SITE

Grand Junction, Colo.	Parkersburg, W. Va.	Zanesville, Ohio
Greenwood, Miss.	Prescott, Ariz.	Zuni, N.M.

Locations in parenthesis are controlled from listed stations.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of const, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

√DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective on August 1, 1950, unless otherwise advised:

AMENDMENT NO. 45

(1) The Pine Bluff, Arkansas, area, published on June 30, 1950, in 15 F.R. 4187, is amended by changing the "Time of Designation" column to read: "Continuous".

(2) The Pocatello, Idaho, area, published on April 21, 1949, in 14. F. R. 1913, and on July 16, 1949, in 14 F.R. 4287, is amended by changing the "Using Agency" column to read: "Naval Ordnance Plant, Pocatello, Idaho".

(3) The Scenic, South Dakota, area, published on April 21, 1949, in 14 F. R. 1913, and on July 16, 1949, in 14 F.R. 4287, is amended by changing the "Using Agency" column to read: "Rapid City Air Force Base, South Dakota".

(4) The Mana, Kauai, Territory of Hawaii, area is deleted.

√AIR ROUTE TRAFFIC CONTROL AREA BOUNDARY REVISIONS: Effective August 15, 1950, the Atlanta-Memphis Control Area Boundary on Red Civil Airway No. 52 will be relocated from 25 miles Southeast of Muscle Shoals, Alabama to a point 50 miles Southeast of Muscle Shoals. Concurrently with this change in control area boundary the flight advisory boundary will be revised accordingly.

V AMENDMENTS TO CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, AND REPORTING POINTS: Effective 0001 EST August 31, 1950, civil airways, control areas, control area extensions, control zones and reporting points will be amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red Civil Airway No. 9 is amended to read: (San Diego, Calif., to Winslow, Ariz.) From the San Diego, Calif. rdo rng stn via the intxn of the E crs of the San Diego, Calif. rdo rng and the W crs of the El Centro, Calif. rdo rng El Centro, Calif. rdo rng stn.....

(2) Red Civil Airway No. 11 is amended to read: (Tulsa, Okla., to Boston, Mass.) DELETE portion from the intersection of the NE crs of the Tulsa, Okla. rdo rng and the S crs of the Chanute, Kansas rdo rng via the Springfield, Mo. rdo rng stn,....change last portion of Red 11 to read: From the Elmira, N.Y. rdo rng stn via the Albany, N.Y. rdo rng stn to the intxn of the NE crs of the Hartford, Conn. rdo rng and the W crs of the Boston, Mass. rdo rng. From the Boston, Mass. rdo rng stn to the intxn of the E crs of the Boston, Mass. rdo rng and the NE crs of the Squantum, Mass. rdo rng.

(3) Red Civil Airway No. 21 is amended to read: (Pittsburgh, Pa. to Boston, Mass.) From the intxn of the NE crs of the Pittsburgh, Pa. rdo rng and the NW crs of the Altoona, Pa. rdo rng via the intxn of the NE crs of the Pittsburgh, Pa. rdo rng and the N crs of the Altoona, Pa. rdo rng to the Selinsgrove, Pa. non-directional radio bcn.....

(4) Red Civil Airway No. 34 is amended to read: (Charleston, W. Va. to Elizabeth City, N.C.) From the intxn of the E crs of the Charleston, W. Va. VHF rdo rng and the N crs of the Pulaski, Va. rdo rng via the Pulaski, Va. rdo rng stn to the Greensboro, N.C. rdo rng stn.....

(5) Red Civil Airway No. 37 is amended to read: (Dallas, Texas to Gordonsville, Va.) ... the intxn of the E crs Stuttgart, Ark and W crs of the Memphis, Tenn rdo rng. From the intxn of the NE crs of the Huntington, W. Va. rdo rng and the W crs of the Charleston, W. Va. VHF rdo rng via the Charleston, W. Va. VHF rdo range stn; the intersection of the E crs of the Charleston, W. Va. VHF rdo rng and the N crs of the Roanoke, Va. rdo rng; Roanoke, Va. rdo rng; Lynchburg, Va. rdo rng stn to the Gordonsville, Va. rdo rng stn.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts. (8-1-50)

GOOD OPERATING PRACTICES

A comprehensive analysis of air traffic incidents which occurred in 1949 reveals that traffic conflictions occurred quite frequently when no one had violated any specific air traffic rule. Such conflictions might be reduced by writing more rules, but there is serious doubt as to the practicability of writing more rules when many of our air traffic problems are due to difficulty in applying existing rules. Furthermore, it is extremely unlikely that air traffic rules can ever be written so as to eliminate the need for good judgment in the planning and conduct of every flight.

Conformance with the following Good Operating Practices will greatly reduce traffic conflictions:

1. Use reasonable restraint in exercising the prerogatives of VFR flight, especially in terminal areas.

   The weather minimums and distances from clouds are minimums. Giving yourself a greater margin in specific instances is just good judgment.

   a. Conducting a VFR operation in a control zone when the official visibility is 3 or 4 miles is not prohibited, but good judgment would dictate that you keep out of the approach area.

   b. It has always been recognized that precipitation reduces forward visibility. Consequently, although again it may be perfectly legal to cancel your IFR flight plan at any time you can proceed VFR, it is good practice, when precipitation is occurring, to continue IFR operation into a terminal area until you are reasonably close to your destination.

   c. In conducting simulated instrument flights, be sure that the weather is good enough to compensate for the restricted visibility of the safety pilot or your greater concentration on your flight instruments. Give yourself a little greater margin when your flight path lies in or near a busy airway or close to an airport.

2. Be alert at all times, especially when the weather is good.

   Most pilots pay attention to business when they are operating in full IFR weather conditions, but strangely, air collisions almost invariably have occurred under ideal weather conditions. Unlimited visibility appears to encourage a sence of security which is not at all justified.

3. If you think another aircraft is getting too close to you, give way instead of waiting for the other pilot to respect the right-of-way to which you may be entitled.

   It is a lot safer to pursue the right-of-way angle after you have completed your flight.

4. Plan and conduct an IFR operation unless the weather is well above VFR minimums.

   When a flight cannot be completed safely under Visual Flight Rules is strictly a matter of judgment. Good judgment would dictate that you use this prerogative very conservatively.

5. Use the Federal Airways.

   The establishment of the Federal Airways system costs the Government millions of dollars annually. The operation and maintenance of the system costs additional millions every year. Sure, you can stay off the airways most of the time during certain flights by electing to fly "direct," but why ignore the additional safety available in controlled airways?

6. Follow IFR procedures even when operating VFR.

   You don't have to follow IFR procedures if you are conducting a VFR operations but you cannot maintain instrument proficiency without practicing at every opportunity. Use all the navigational aids available and make accurate position reports.

7. When conducting an IFR operation, make a written record of your ATC clearance.

   The specified conditions which are a part of your air traffic clearance may be somewhat different from those included in your flight plan. Additionally, air traffic control may find it necessary to add conditions, such as a particular departure route. The very fact that air traffic control specifies different or additional conditions means that other aircraft are involved in the traffic situation.

Conformance with the above Good Operating Practices is not as simple as it sounds. It requires constant attention to innumerable details and a deep-seated realization that additional hazards incident to flight operations exist whenever vigilance is relaxed.

(8-1-50)

AIR DEFENSE AREAS

PACIFIC OCEAN (WEST COAST) AIR DEFENSE AREAS: Effective Date June 1, 1950. In the interest of safety, all airmen proposing flight which will approach the West Coast of the United States from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area, between the Canadian - United States Border and the United States - Mexican Border are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Similarly, airmen flying coastwise in the Pacific Ocean Area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flight operations within the continental limits of the United States adjacent to the above described area, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline.

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York, or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

Note: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coastline are not affected by the above.

EASTERN CANADIAN BORDER AIR DEFENSE AREA: Effective Date May 5, 1950. In the interest of safety, all airmen proposing flight which will cross the Canadian Border, southbound, east of the 87th meridian, (Lake Michigan) are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to flight operations within the continental United States adjacent to this area or northbound flights crossing the Canadian Border.

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF LOS ALAMOS REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

SEATTLE-HANFORD AIR DEFENSE AREA: Effective Date May 5, 1950. The United States Air Force has activated an Air Defense Area in the northwest section of the United States. This area is bounded by a line drawn from the coast at North Bend, Oregon to Ontario, Oregon, northeast from Ontario, Oregon to Superior, Montana and from Superior, Montana north to the Canadian Border, thence westward along the Canadian - United States Border to the Pacific Ocean, south along the Pacific Coast to the point of beginning (North Bend, Oregon).

In the interest of safety, all airmen proposing flight which will approach the above described defended area, at any altitude, from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area or across the Canadian - United States Border, southbound, at any altitude, are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility.

Similarly, pilots flying coastwise adjacent to this area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner.

In addition, pilots of aircraft approaching this area from within the continental limits of the United States at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

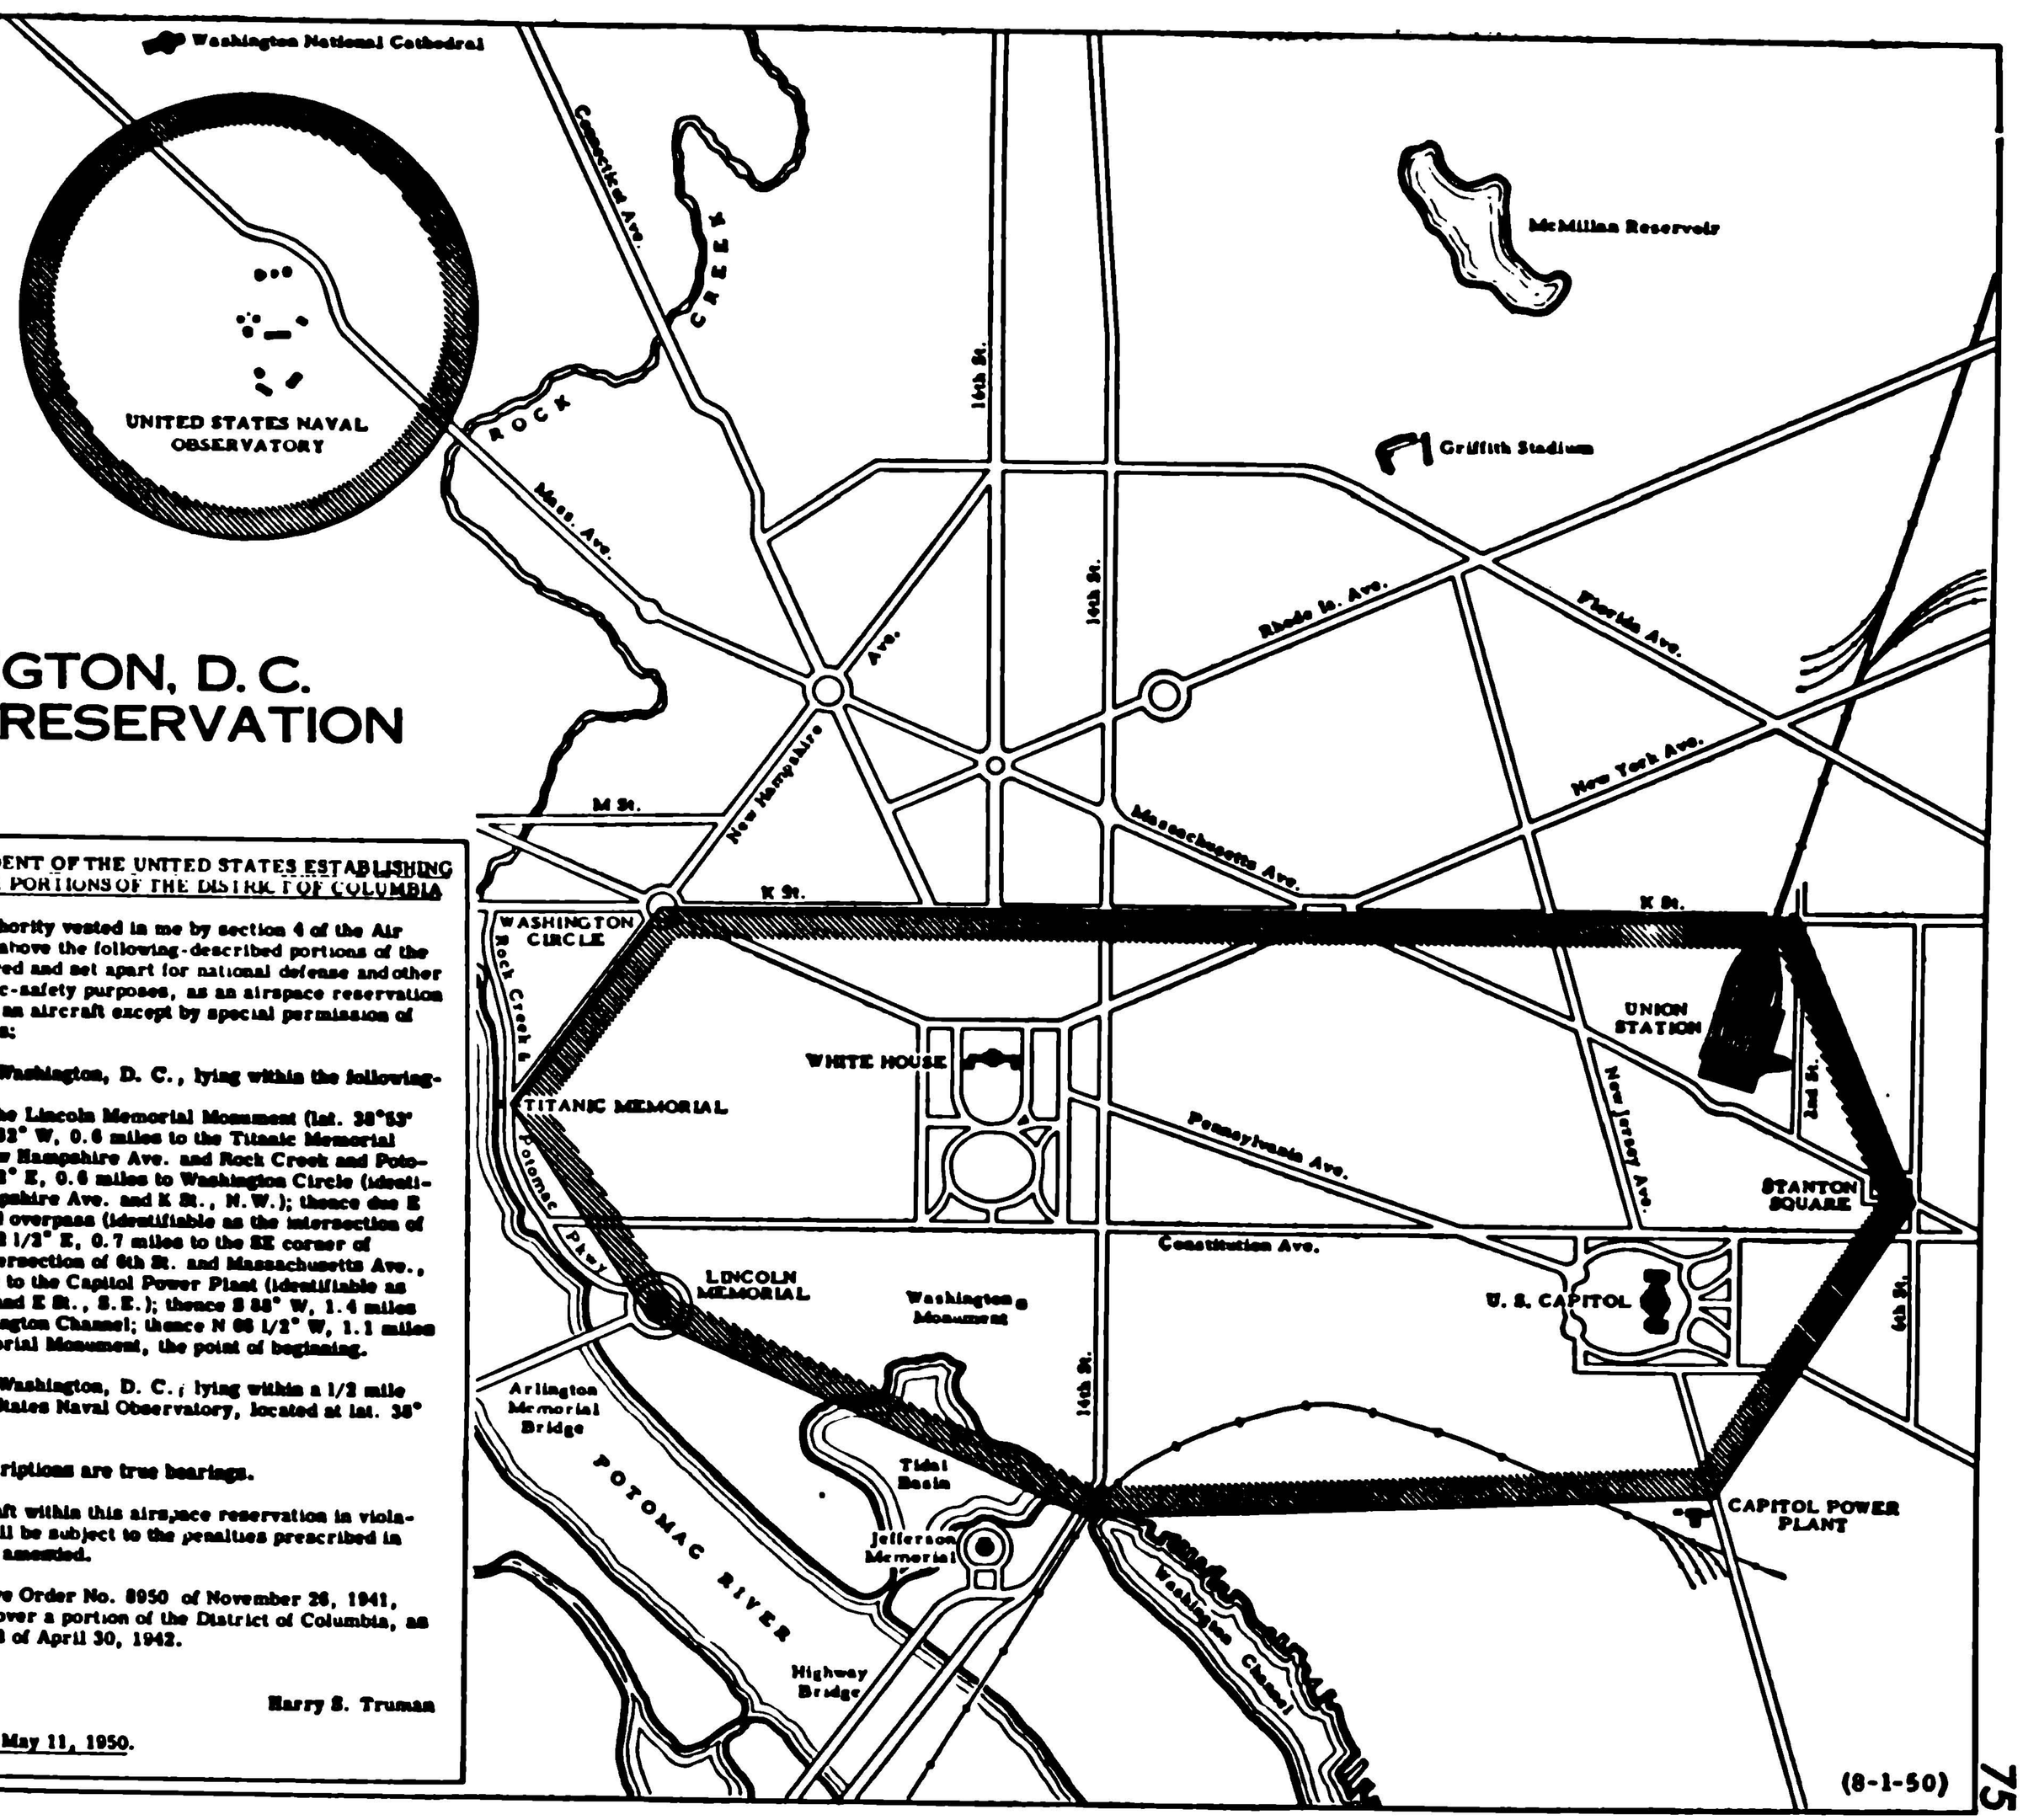
This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to aircraft operating within the continental limits of the United States, when flying at less than 10,000 feet MSL or 4,000 feet above the immediate terrain, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline.

THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF HANFORD, WASHINGTON REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

(8-1-50)

WASHINGTON, D. C.
AIRSPACE RESERVATION



EXECUTIVE ORDER OF THE PRESIDENT OF THE UNITED STATES ESTABLISHING AN AIRSPACE RESERVATION OVER PORTIONS OF THE DISTRICT OF COLUMBIA

By virtue of and pursuant to the authority vested in me by section 4 of the Air Commerce Act of 1926, the airspace above the following-described portions of the District of Columbia is hereby reserved and set apart for national defense and other governmental purposes, and for public-safety purposes, as an airspace reservation within which no person shall navigate an aircraft except by special permission of the Administrator of Civil Aeronautics:

1. All that area within the City of Washington, D. C., lying within the following-described boundaries:

Beginning at the SW corner of the Lincoln Memorial Monument (lat. 38°53' 21" N, long. 77°03'02" W); thence N 32° W, 0.6 miles to the Titanic Memorial (identifiable as the intersection of New Hampshire Ave. and Rock Creek and Potomac Parkway, N.W.); thence N 36 1/2° E, 0.6 miles to Washington Circle (identifiable as the intersection of New Hampshire Ave. and K St., N.W.); thence due E along K St., 2.5 miles to the railroad overpass (identifiable as the intersection of K St. with 2nd St., N.E.); thence S 22 1/2° E, 0.7 miles to the SE corner of Stanton Square (identifiable as the intersection of 6th St. and Massachusetts Ave., N.E.); thence S 23 1/2° W, 0.8 miles to the Capitol Power Plant (identifiable as the intersection of New Jersey Ave. and E St., S.E.); thence S 58° W, 1.4 miles to the railroad trestle over the Washington Channel; thence N 66 1/2° W, 1.1 miles to the SW corner of the Lincoln Memorial Monument, the point of beginning.

2. All that area within the City of Washington, D. C., lying within a 1/2 mile radius from the center of the United States Naval Observatory, located at lat. 38° 55'17" N, long. 77°04'02" W.

All bearings used in above descriptions are true bearings.

Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938, as amended.

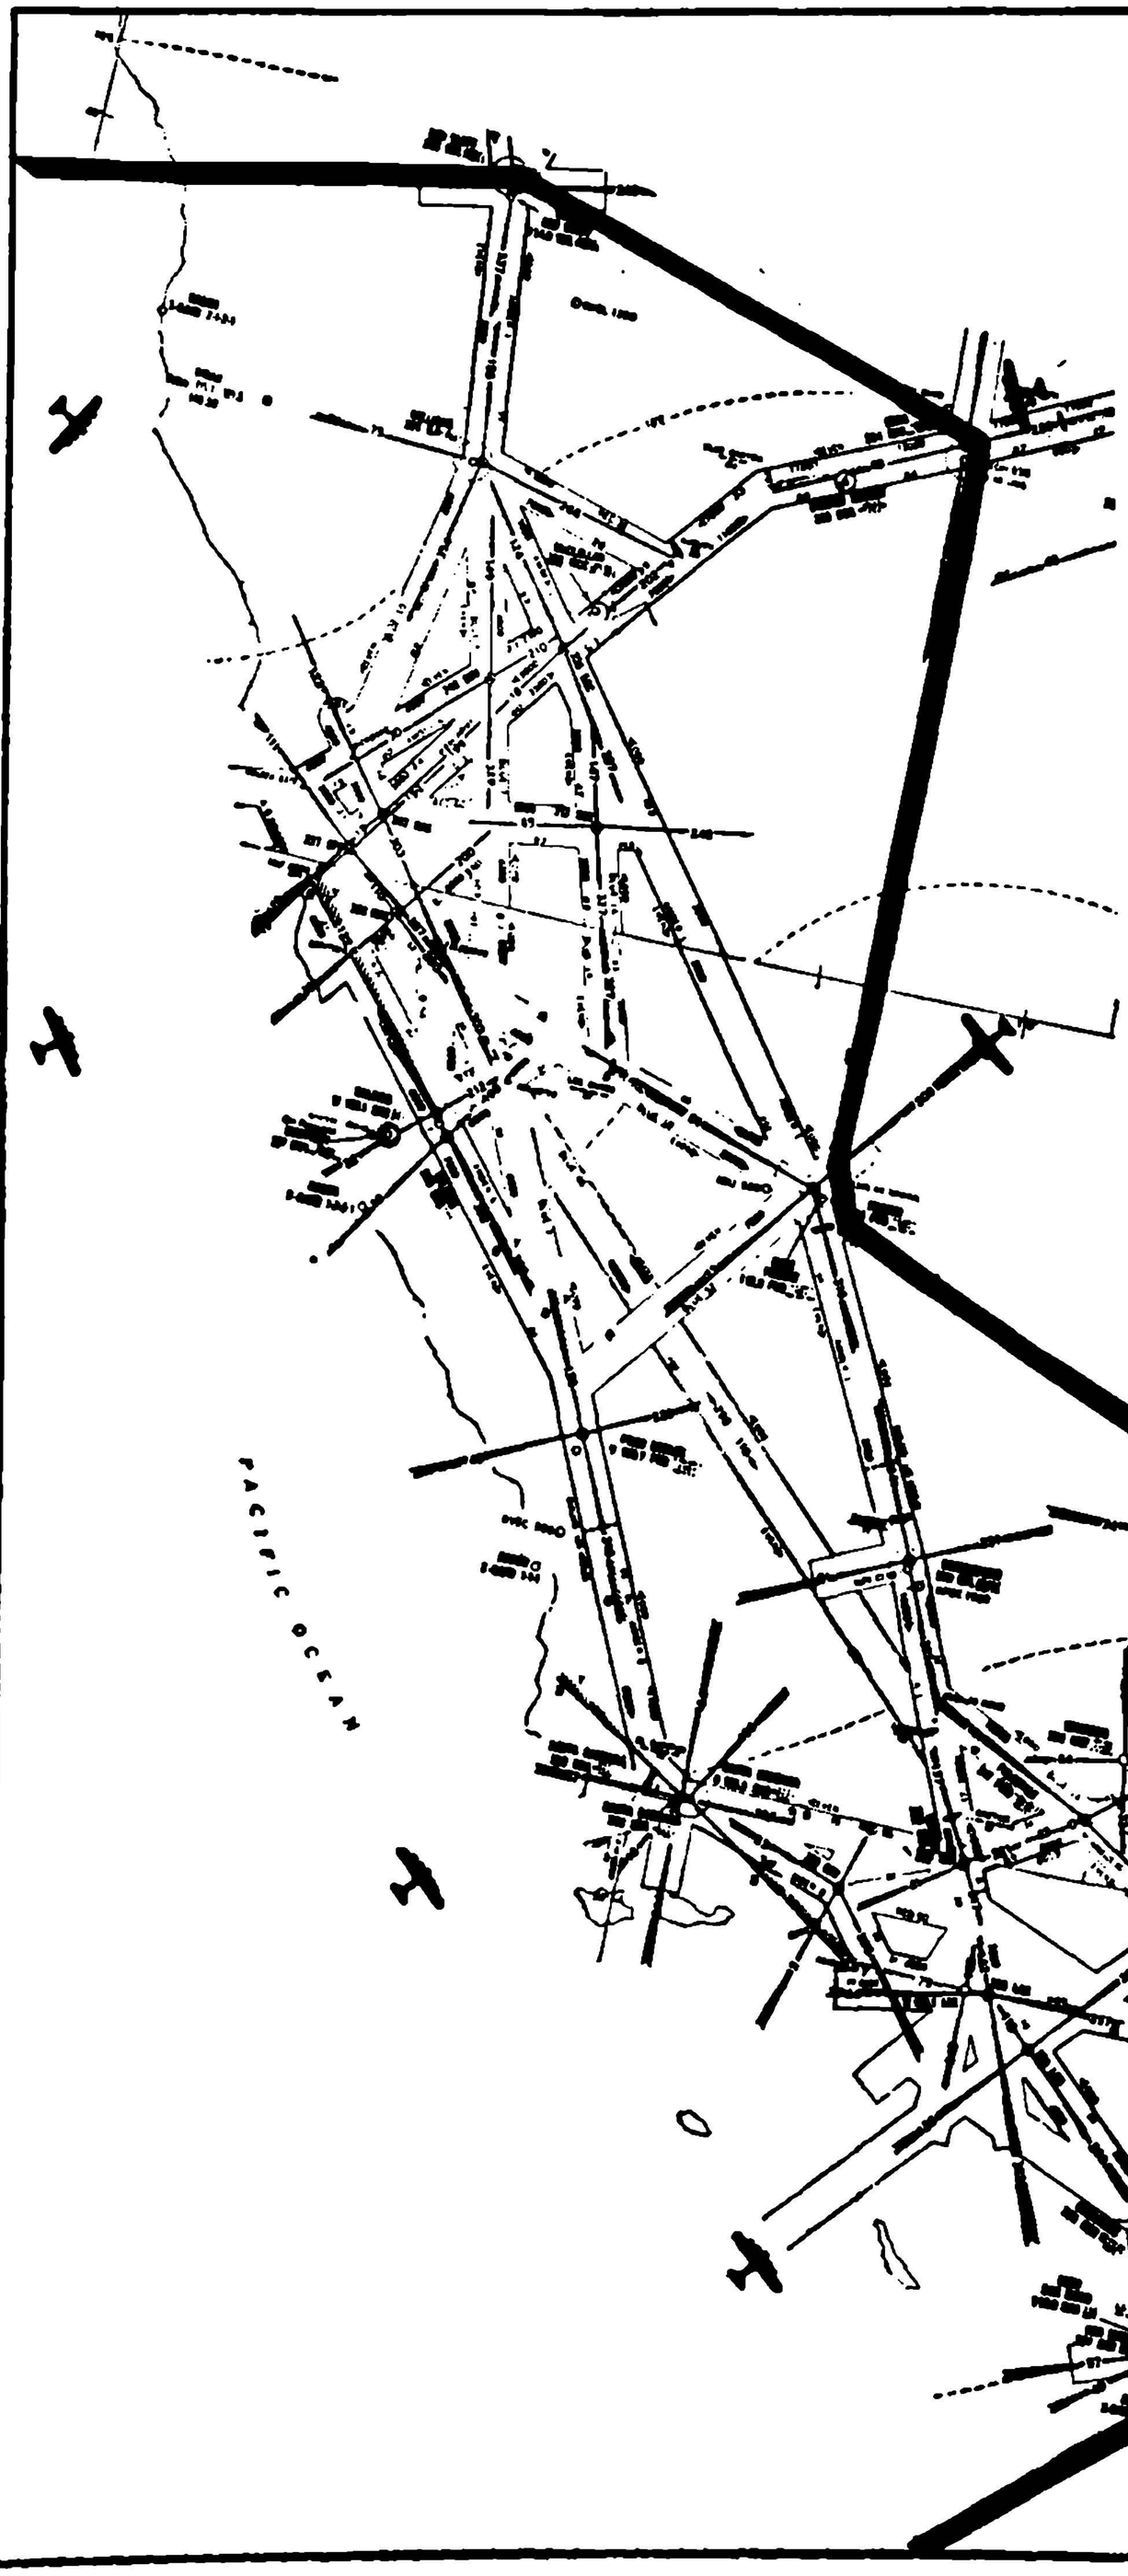
This order supersedes Executive Order No. 8950 of November 26, 1941, establishing an airspace reservation over a portion of the District of Columbia, as amended by Executive Order No. 9153 of April 30, 1942.

Harry S. Truman

This order became effective on May 11, 1950.

(8-1-50)

AIR DEFENSE EXERCISE



SPECIAL AIR DEFENSE EXERCISE
AUGUST 22-28, 1950, INCLUSIVE

Due to Special Air Defense Exercises to be conducted in the Oakland and Los Angeles Domestic Air Route Traffic Control Areas during the period August 22 through August 28, 1950, all airmen proposing flight which will enter these areas from a northerly, easterly or southerly direction at an altitude greater than 10,000 feet MSL or 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans with the appropriate aeronautical facility. Failure to do so may result in in-flight identification by fighter aircraft. The above is in addition to the flight plans desired on aircraft approaching from the Pacific Ocean Area as requested in the Special Notice to Airmen dated June 1, 1950, subject: "Pacific Ocean (West Coast) Air Defense Area" (See Airman's Guide dated June 6, 1950).

The following is a general description of the Special Exercise Area's Boundary which will be displayed in chart form on the last page of the Airman's Guide dated August 1, 1950:

From the intersection of the coast line and the west course of the Red Bluff, California radio range station, due east to Red Bluff radio range station then southeast to Reno, Nevada radio range station then south to Fresno, California radio range station and then southeast to the radio range station at Needles, California, and thence paralleling the west side of civil airway Blue 67 to Yuma, Arizona and from this point along the United States-Mexican Border to the Pacific Ocean.

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICES

USE OF INACTIVE AIR FORCE AIRFIELDS: See page 57.

VOL. 5, NO. 11 .. AUGUST 15, 1950

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

The printing of this publication has been approved by the Director of the Bureau of the Budget, March 28, 1950

For sale by Superintendent of Documents, U.S. Government Printing Office Washington 25, D.C. - Price 25 cents per copy, $6.00 per year.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Arcata, Calif.	DISCONTINUED

LEGEND

- G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
- HF = 3475,4890,6640 kc.
- # = Guards all VHF frequencies station transmits.
- (E) = Emergency use, as 121.5 (E).
- ** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
- * = Air Force guard 4496,4765,3117.5 kc and 121.5 mc.
- (D) = Day. (N) = Night.
- → = New or revised data.

(A)-Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. LMM's, LOM's are at the same locations as the middle and outer markers unless otherwise specified. →New or revised data. + = additional data will be found in Notices to Airmen section. *Continuous dots. <
(BC-8)=Lclzr back course non-standard and usable only to 8 mi.(BC-unusable)=Back course unusable.

(8-15-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 57

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI. . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . .VHF middle marker
LMM. . .Compass locator station when combined with middle marker of ILS
MOR. . .Low frequency omni-directional range
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
LOM. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. See page 57 for list of CAA INSACs which stand watch on 3117.5 kc.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-U.S. Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-U. S. Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Low intensity runway
- 5 - Low intensity instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES.

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:

Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Stations)

			4...118.1	International airdrome control towers
F...( )	5...( )	F...( )		Tactical or as required
			5...143.28	General Communications
G...137.70	6...143.64	G...142.02	6...143.64	GCA
H...134.1	7...142.02	H...134.64	7...142.02	GCA
	8...134.64		8...134.1	GCA
	9...126.18		9...126.18	Control towers
Guard.... 121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

✓ Indicates new or revised Special Notices

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at may VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec. 1, 1949; Location Identifiers, Third Edition, Sept 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept. 1, 1948, with two revisions.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan 24, 1950; Teletype Maps: M-10, Jan 1, 1949; M-11, Dec 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP IV MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Hq, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL 79. Chattanooga, Tenn., Change elevation to 682'. Min alt over Aerodrome: 1382'.

(2) AL 146. Columbus, Ga., Lawson AFB. LF rdo rng crss have been realigned to: 201-293-21-116 magnetic. (No change in instrument approach procedure is necessary).

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL 226. Laredo, Texas. Change distance stn to fld to: 3.2 mi.

(2) AL 259. Miles City, Mont. Change bear and dist stn to fld: 55°, 2.2 mi.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Coprs aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in, or over, Canadian territory.

COMPASS LOCATOR SYMBOLS: To conform with ICAO standards the letter "L" is now in use as the abbreviation denoting a compass locator. This replaces the "CL" or "K" as used in the past on charts or in the Airman's Guide. "OMK" now becomes "LOM"; "MMK" now becomes "LMM"; "IMK" becomes "LIM".

The abbreviation "L" as used in the Airman's Guide indicated L/MF voice facility on other than range frequency. This now becomes "J".

See Radio Class Designations, Page VI.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 kc: All CAA airway communications stations other than those listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

Acomita, N.M.	Hayes Center, Neb.	Rock Springs, Wyo.
Akron, Colo.	Hutchinson, Kans.	Salina, Kans.
Battle Mt., Nev.	Joliet, Ill. (Naperville)	Santa Fe, N.M.
Butler, Mo.	Kirksville, Mo.	Sidney, Neb.
Columbia, Mo.	Lafayette, Ind.	Springfield, Ill.
Dalhart, Texas	Lafayette, La.	Springfield, Mo.
Dodge City, Kans.	Laramie, Wyo. (Rock River)	Sinclair, Wyo. (Cherokee)
Dyersburg, Tenn.	Las Vegas, N.M.	Terre Haute, Ind.
Eagle, Colo.	Lebo, Kans.	Texarkana, Ark.
Effingham, Ill.	Lovelock, Nevada	Tucumcari, N.M.
El Dorado, Ark.	Malden, Mo.	Vichy, Mo.
Elko, Nev.	Mansfield, Ohio	Russell, Kans. (Waldo)
Farmington, Mo.	Moline, Ill.	Walnut Ridge, Ark.
Ft. Bridger, Wyo.	Monroe, La.	Wendover, Utah
Gage, Okla.	Needles, Calif.	Wilkes-Barre, Pa.
Garden City, Kans.	North Platte, Neb.	Williamsport, Pa.
Galveston, Texas	Otto, N.M.	Winslow, Ariz.
Grand Island, Neb.	Paducah, Ky.	Worcester, Mass. (Gardner)
Grand Junction, Colo.	Parkersburg, W. Va.	Zanesville, Ohio
Greenwood, Miss.	Prescott, Ariz.	Zuni, N.M.

Locations in parenthesis are controlled from listed stations.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of const, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

THE FOLLOWING BEACON SITES WILL BE DISCONTINUED JULY 31, 1950:

ATL-LGA	SITE
Blackstone, Va.	42
Riverdale, Md.	57A
Glenburnie, Md.	58
BNA-DCA	
Pine Ridge, Va.	33A
Dublin, Va.	35B
BUF-LGA	
Castile, N. Y.	4
CHI-LGA	
Clarksville, Pa.	38

Moon Run, Pa.	19
Clinton, Pa.	20
LGA-BOS	
New Haven, Conn.	7
Cromwell, Conn.	H1
Wellesley Hills, Mass.	18

The above sites are all located in the First CAA Region. See Notices To Airmen for additional sites to be discontinued in the near future.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control twr or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

FLIGHT ADVISORY AREA BOUNDARY REVISIONS: Effective September 1, 1950, the Oakland-Los Angeles and Oakland-Seattle Flight Advisory Area Boundaries are revised as follows: Oakland-Los Angeles, ... and from a point on Amber 8, 25 miles S of the Paso Robles rng. direct to the junction of the 35th parallel with the eastern boundary of the Oakland ICAO Flight Information Region. Oakland-Seattle, ... and from a point on Amber 1, 10 miles S of the Ft. Jones, Calif. rng direct to a point a lat 40-00N; long. 127-00W.

NON-STANDARD HOLDING PATTERN: Effective September 1, 1950, the following non-standard holding pattern is established: Holding Point - Salem, Mich. (VAR), Direction From Holding Point - North, Direction of Turn - Left on east side of N crs, Time - 2 minutes.

COMPULSORY REPORTING POINT NAME CHANGE: Effective September 5, 1950, the name of the North Altoona intxn (the intxn of the E crs of Pittsburg, Pa. and the N crs of of Altoona, Pa.) will be changed to Tyrone intxn.

ON-REQUEST REPORTING POINTS: Effective immediately, the following on-request reporting points are designated or redesignated. (1) Long Beach intxn redesignated as the intxn of the E crs Floyd Bennett and SW crs Mitchel or the intxn of SE crs of Idlewild and SW crs Mitchel.

(2) Fire Island intxn redesignated as the intxn of the SE crs Mitchel and the SW (visual) crs Islip.

(3) Sully Intxn designated as the intxn of the SE crs Idlewild and the SW (visual) crs Islip. Effective September 1, 1950, name designators for Fire Island and Sully intxns will be used in Artc clearances.

DANGER AREA DESIGNATIONS: The following Danger Area amendments are effective when indicated, unless otherwise advised.

AMENDMENT NO. 46 (August 15, 1950)

(1) The Camp Le Jeune, North Carolina, area, published on April 21, 1949, in 14 F. R. 1913, and on July 16, 1949, in 14 F. R. 4287, is deleted.

(2) The Cherry Point, North Carolina, area, published on April 21, 1949, in 14 F. R. 1913, a and on July 16, 1949, in 14 F. R. 4287, is amended to read: Location: Cherry Point (Norfolk Chart); Description: (1) Beginning at a point 3 nautical miles from the U. S. shoreline at approximate lat. 35-06-00N, long. 75-50-40W; Southwesterly, 3 nautical miles from and parallel to the shoreline to lat. 34°54'30"N, long. 76°08'45"W; due W to a point on the shoreline of the North Carolina mainland at long. 76°18'30"W; southwesterly and westerly along the shoreline of the North Carolina mainland to lat. 34°42'00"N, long. 76°59'00"W; due W to long. 77°23'40"W; SW to lat. 34°21'30"N, long. 77°41'40"W; clockwise along the arc of a circle with a radius of 60 miles, centered at lat. 34°54'30"N, long. 76.53'00"W, to lat. 35°06'00"N, long. 75°50'40"W, point of beginning; Altitudes: 10,000' to 18,000'; Time: Sunset to sunrise, daily; Using Agency: Marine Corps Air Station, Cherry Point, North Carolina.

Beginning at a point 3 nautical miles from the U. S. shoreline at lat. 34°54'30"N, long. 76°08'45"W; southwesterly, 3 nautical miles from and parallel to the shoreline to a point 2 nautical miles NE of the NE boundary of ICAO Control Area #1151 at approximate lat. 34°17'30"N, long. 77°37'50"W; NW to lat. 34°20'45"N, long. 77°42'15"W; NE to lat. 34°42'00"N, long. 77°23'40"W; due E to a point on the shoreline of the N.C. mainland at long. 76°59'00"W; easterly and northeasterly along the shoreline of the N.C. mainland to lat. 34°54'30"N, long. 76°18'30"W; due E to lat 34°54'30"N, long. 76°08'45"W, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Marine Corps Air Station, Cherry Point, North Carolina.

(8-15-50).

AMENDMENT No. 47 (August 18, 1950)

(1) The Peason Ridge, Louisiana, area, published on Feb. 9, 1950 in 15 F. R. 705, is deleted.

(2) The Albany, New York, area, published on June 23, 1949, in 14 F. R. 3393, and on July 16, 1949, in 14 F. R. 4287, is deleted.

(3) The Oswego County, New York, area, published on April 11, 1950, in 15 F. R. 2036, is amended by changing the "Time of Designation" column to read: "Continuous, April 11, 1950 through March 15, 1951".

(4) The Albemarle Sound, North Carolina, area, published on April 21, 1949, in 14 F. R. 1913, and on July 16, 1949, in 14 F. R. 4287, is amended by deleting areas (4) and (5).

(5) The Kitty Hawk, North Carolina, area, published on April 21, 1949, in 14 F. R. 1913, and on July 16, 1949, in 14 F. R. 4287, is deleted.

(6) The North Carolina Coastal, North Carolina, area, published on April 21, 1949, in 14 F. R. 1913, and on July 16, 1949, in 14 F. R. 4287, is deleted.

(7) The Wanchese, North Carolina, area, published on April 21, 1949, in 14 F. R. 1913, and on July 16, 1949, in 14 F. R. 4287, is deleted.

(8) A Muskogee (Camp Gruber), Oklahoma, area is added to read: Location: Muskogee (Camp Gruber) (Little Rock Chart); Description: A circular area having a radius of 2 miles, centered at lat. 35 42'00" N, long. 95 00'00" W, Altitudes: Surface to 10,000', Time: Sunrise to sunset, 7 days a week; Using Agency: 125th Fighter Squadron, Oklahoma Air National Guard, Tulsa, Oklahoma.

(9) The Haven, Wisconsin, area, published on March 30, 1950, in 15 F. R. 1783, is amended by changing the "Time of Designation" column to read: "0500 to 2000, daily."

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	
Mankato, Minn.	44 09', 93 58'	SW reports to be available soon
Pecos, Texas (Pecos Airport)	31 24', 103 31'	" "
Clinton, Mo.		6-hourly reports discontinued
Gainesville, Fla., Gainesville Arpt.	29 42', 81 16'	SW reports to be available soon

Note: Airway Terminal Forecasts discontinued for Fairfield, Utah, (Fairfield Intermediate Field). SW reports will not be available from Kansas City, Mo. (Grandview Arpt), and Kankakee, Ill., as planned.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ANNISTON ARPT: Ctn - strips being extended. (8-8)

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)

BROOKLEY AFB (MOBILE): Rnwy 14-32 clsd 0700-1600, Mon-Fri (const). (6-30)

**COURTLAND-BAY FLD: (Reinstated). Lat 34-42-30, long. 87-15-45 (8-8)

CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)

EVERGREEN-MIDDLETON ARPT, SITE 20, MSY-ATL: Ctn - vehicles on fld intermittently.

ALABAMA Rnwys, taxi strips being used as access road to adj ind (5-30)

**LANETT BCN SITE 35, MSY-ATL: Bcn chgd from 6 rpm to 12 rpm. (8-1)

LANETT-VALLEY ARPT: NE SW Strip clsd (const). (8-8)

★MAXWELL AFB (MONTGOMERY)-RADIO: USAF VHF DF also oper on 137.34 mc. (8-2)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17) Rnwy 6-26 clsd until approx Sept 2, on taking [illegible]

**MONTGOMERY-[illegible] FLD: New fld. Lat 32-27-45, long. 87-21-00. (8-1)

[illegible]

ARIZONA **BAGDAD ARPT: New fld. Lat 34-35-30, long. 113-10-15. (6-20)

DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (6-27)

FORT HUACHUCA: The estab of a Temp Controlled Firing Area in the vcnty has been approved as follows: Description: N bndry - lat 31-37, S bndry - lat 31-33-23; E bndry - long. 110-23-20; W bndry - long. 110-25-45. Altitudes: Surface to 7000' above terrain. Time of Use: Aug 30 thru 31, 1950, from 0700 to 1500. Activities: Artillery firing. Using Agency: Arizona National Guard. Adequate Notices to Airmen will be issued in advance of firing activity.

PHOENIX-SKY HARBOR ARPT: Use rnwys only. Ctl twr being erected approx 800' N of intxn of Rnwy 12-30 and N S Taxiway. Ctn - equip crossing taxiway. Rnwy 12-30 clsd. (6-23)

TUCSON ARPT: Rnwy 17-35 clsd. (7-19)

★WINSLOW-RADIO: MR fac lctd lat 35-00-58, long. 110-41-45. Bear., dist stn to Winslow Arpt 236°, 0.7 mi. (8-3) Correct ident. "IMH". (8-8)

ARKANSAS BATESVILLE ARPT: Const. Use N S Rnwy only. (6-22)

BENTONVILLE ARPT: Strip under const. Use taxi strip for ldg. (6-28)

CAMDEN-HARRELL ARPT: Ctn - const. (7-26)

**EL DORADO ARPT: 209' obst lgtd twr Rdo Stn KDMS erected 4 mi NNE (20°T) at lat 33-14-11, long. 92-38-48. (6-12)

EL DORADO-GOODWIN ARPT: Ctc lgts Rnwy 13-31 inop. (7-6)

FT. SMITH-RADIO: Soon, omnirng on 113.1 mc shut down - modernization. (7-17)

FT. SMITH ARPT: Const W end E W Rnwy. Use N S Rnwy. (7-6)

LITTLE ROCK-ADAMS FLD: Ctn - rnwys under const. (6-22)

CALIFORNIA ★ALAMEDA NAS-RADIO: Navy VHF DF unit is avail on req. (8-3)

**ALAMEDA NAS SEAPLANE BASE: Indg lane 3-21 used only for take-offs except emerg. (8-3) Lgtg avail on 1 hr prior req. (8-9)

BAKERSFIELD-RADIO: Omnirng not usable between 90 and 130° from stn - scalloping. (6-20)

BAKERSFIELD-KERN CO. #1 ARPT: When ctl twr inop tetrahedron will be free swinging. Rnwy 12-30 will be lctd. (8-5)

BRAWLEY ARPT: NW SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. NE SW, E W Strips clsd. (5-30)

BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3)

CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Figt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.

CAMARILLO-RADIO: LF rng on 359 kc on S ers displaced 3°E. (8-1)

CAMP COOKE: A temp Danger and Airspace Warning Area for anti-acft artillery firing has been estab to the W for use from the surface to 39,000'. The area is designated for cont use between the following dates: Aug 21-27, 1950, inclusive. Area is bounded as follows: N: lat 35-07; S: lat 34-29; E: long. 120-36; W: long. 120-57-30. That portion of the area which lies beyond the 3 mi limit of the shoreline has been designated a temp airspace Warning Area.

CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)

COALINGA ARPT: NW SE and NE SW Rnwys clsd (const). Equip on fld. (7-3)

**COLUSA-DAVIS DUSTERS ARPT: New fld. Lat 39-12-00, long. 122-02-45. (6-6)

CRESCENT CITY-RADIO: About Aug 15, voice fac on 272 kc and rcvr on 3105 kc will be comm at INSAC. Class: BVOR-DTVJ. (7-21)

CRESCENT CITY-DEL NORTE CO. ARPT: Taxiway W end E W Rnwy clsd (drifted sand). Use rnwy for taxying. (6-18)

EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs. for permission to cont to fld. (8-3; (8-15-50)

CALIFORNIA: EL CENTRO NAAS: Const on rnwys. (3-20)
EL TORO MCAS (SANTA ANA)-TOWER: Navy GCA inop. (7-5)
**EUREKA-HUMBOLDT CO. ARPT: FIDO control units in twr removed and installation decomm. (8-10) These data rcvd too late for deletion from Directory of Arpts.
FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop until approx Sept. 1. (8-1) FLD: N/S Rnwy clsd. (6-20)
FRESNO-RADIO: Soon omnirng on 112.9 mc will be shut down until approx Sept. 7. (7-17)
GEORGE AFB (VICTORVILLE): Ctn-rnwys under repair. (8-3)
GRIMES-FARNSWORTH ARPT: Clsd (flooded). (8-11)
**HONCUT-CLODDY ARPT: (New Fld). Lat 39-19-45, long. 121-32-00. (6-8)
HUNTER-LIGGETT MILITARY RESERVATION: A temp Danger Area for fld artillery firing has been estab approx 10 mi S of King City for use from the surface to 10,000'. The area is designated for cont use between the following dates: Aug 21-27, 1950, inclusive. Area is bounded as follows: Beginning at lat 35-59, long. 121-00-30; due S to lat 35-49-27; due W to long. 121-24-15; due N to lat 36-04-05; due E to long. 121-06; SE to point of beginning.
KING CITY ARPT: 2000' S end and 500' N end N/S Rnwy unlgtd. Center portion lgtd on req. Ctn-embankment N end N/S Rnwy. (5-31)
LOS ANGELES-SPECIAL NOTICE: Avoid flying over or near Hollywood Bowl between 2000 and 2300, July 7 to Sept 20 inclusive. The Bowl, mrkd during concert hrs by two stationary crossed red searchlgt beams, lies about 7 mi NW of the center of Los Angeles and 6 mi SSE of Lockheed Air Terminal. (7-6)
LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS operg from temp lctn 2125' W
** of W end of Rnwy 25L. Course aligned to center of Rnwy 25L and is normal by flgt-check. Lclzr back course not usable. Mar. 31, new mobile CAA ILS lclzr on channel "V", 108.7 mc comm on test basis. Antenna array and transmitter truck lctd 4557' W of W end Rnwy 25R, obst lgtd. Disregard spurious signals. Not flgt-checked. PACKWOOD ARPT: Emerg fld only. Equip on fld. (8-10)
PORT ANGELES-RADIO: About Aug 15, LF rng freq 382 kc will be changed to 329 kc. (8-10)
**QUINCH-BLANCHETT'S ARPT: (New Fld). Lat 47-12-15, long. 119-56-00. (4-26)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt planestrip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (7-11)
**SEATTLE-GAFFNEY'S LAKE WILDERNESS ARPT: (New Fld). Lat 47-22-45, long. 122-03-00.
SEATTLE NAS-TOWER: Navy GCA inop. (6-21) FLD: Acft in tfc are rstd from flgt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (1-16)
SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: CAA lclzr shut down until approx Nov 15 during rnwy const. LMM, LOM and lgt lane will remain in oper. (7-29) FLD: Two 70' unlgtd poles being erected 1200' E of ILS lclzr bldg. (6-22)
SHELTON-RADIO: About Aug 15, CAA LF rng will be comm. Freq: 379 kc. Ident: "SHN". Lctd: lat 47-14-59, long. 123-05-12. Elev: 210' MSL. Mag var. 23E°. Courses: 43A 139N 223 A 319 N. Class: MRLWZ. (8-10)
★SPOKANE AFB-RADIO: USAF VHF/DF oper 0800-1700 Mon thru Fri for trng only. (8-8)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearley aligned with wind cone S side of fld. When wind cone points 90° to rnwy take-off and ind to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (5-12) 1800' ext. NE end 4490' rnwy. (11-8)
SPOKANE-GEIGER FLD: Five 60' obst lgtd antenna poles lctd 300 yds S of apch end Rnwy 20. Equip on fld. (6-8)
TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Obst lgts on supporting twrs. (7-10)
TAHOLAH: 306' rdo twr being erected 3 mi S at lat 47-18-20, long. 124-16-35. (6-13)
**WALDRON ISLAND-ISLEACRE ARPT: (New Fld). Lat 48-42-45, long. 123-01-00. (6-2)
WENATCHEE: Unmrkd p-line crosses Columbia Riv 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (2-13)
WHIDBEY ISLAND NAS (OAK HARBOR): Ctn-use center of rnwys. Covered drainage ditches on sides of both rnwys not safe for lndg or braking action. (2-15) Rnwy 12-30 clsd Aug 7 to Sept 15 (const). (8-8)
**WILSON CREEK ARPT: (New Fld). Lat 47-25-15, long. 119-06-30. (4-25) E/W Strip clsd (const). (4-25)
YAKIMA-RADIO: Omnirng radials 176° usable 35 mi; 336°, 123° 40 mi; 321° 38 mi. (3-3)
[redacted]: ★CHARLESTON-KANAWHA ARPT-TOWER: Transmitting on 121.9, 110.3 mc and rcvg on 121.9 mc comm at CAA twr. Class AC(g). CAA ILS glide path on 335 kc and LOM on 245 kc operg on test basis. Data rcvd too late for inclusion on ANRA page. (8-14) FLD: Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd day, ngt. Hazard bcns lctd each end Rnwy 14-32 opers on test basis. (7-31) No NG svcg Aug 5 thru Aug 21. (8-14)
ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (8-23)
WHEELING-OHIO-CO. ARPT: Turf area clsd (const). ILS const along NE/SW Rnwy, mrkd. Equip on fld days. Use rnwys, taxiways only. (5-25)

[redacted]: CLINTONVILLE ARPT: Strip 14-32 clsd (const). Strip 4-22 clsd from intsxn to SW end. Strip 9-27 clsd from intsxn to W end. No lgtg avail. (6-26)
HAVEN: Target-towing oper in progress week days until Sept. 10. Ctn advised in area - within a 10 mi radious of Camp Haven, which is located approx 5 mi N of Sheboygan.
IRON RIVER-UNION ARPT: 148' obst lgtd rdo twr being erected 3 mi SE (123°T) at lat 46-33-15, long. 91-24-10. (6-12)
LA CROSSE-RADIO: Omnirng radials unreliable in area bounded by 314° and 331° radials between 20 and 30 mi from rng. (5-8)
MADISON ARPT: Numerous cable trenches along all rnwys and extreme ends of Rnwys 4-22 and 13-31. Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. Poles not dismantled, obst lgtd. (7-21)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 9-27 perm clsd. (1-12)
MILWAUKEE-MAITLAND ARPT: Taxi with ctn. Equip on or near taxiway. (5-12)
MILWAUKEE SEAPLANE BASE: Clsd ngts. Ramp under const. Fuel F3. (6-19)
WAUTOMA ARPT: Apch clearing not completed. (7-25)
WEST BEND ARPT: 193' obst lgtd rdo twr being erected 2.2 mi WSW (250°T) at lat 43-24-40, long. 88-10-16. (6-12)
[redacted]: CASPER-RADIO: Omnirng radials between 10° and 35° from stn not usable at min. inst alt beyond 35 mi dist. (7-14) About Aug 25 S crs LF rng will be realigned to 335°. (7-31) These data rcvd too late for + on ANRA page.
COWLEY ARPT: Ctn - newly graded. (5-12)
GILLETTE ARPT: Ctn - const. Survey stakes W portion of fld. (3-6)
LARAMIE-RADIO: LF rng course monitor. device decomm. (6-1)
MOORCROFT-RADIO: Omnirng radials between 100° and 120° unusable beyond 30 mi at 9000' MSL. (8-8)
ROCK SPRINGS-RADIO: LF rng course monitoring device inop. (8-11)
SHERIDAN CO. ARPT: Equip on fld days. (6-12)
**TEN SLEEP: Correct lat 44-01-30, long. 107-26-30. (4-25)

DATES OF LATEST PRINTS

U. S. Coast and Geodetic Survey

Aeronautical Charts

August 14, 1950

Dates in small type indicate minor changes which are not of sufficient importance to make the previous print obsolete. All charts carrying dates older than those shown in large type on this list are obsolete for use in flight.

(OVER)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Birmingham	Shreveport	WAC 409	FC 230
Corpus Christi	WAC 357	22DF	FC 231

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

ILS 462.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Automatic Direction Finding approach charts, 5 cents each, by number with prefix (ADF); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts. (8-15-50)

GOOD OPERATING PRACTICES

A comprehensive analysis of air traffic incidents which occurred in 1949 reveals that traffic conflictions occurred quite frequently when no one had violated any specific air traffic rule. Such conflictions might be reduced by writing more rules, but there is serious doubt as to the practicability of writing more rules when many of our air traffic problems are due to difficulty in applying existing rules. Furthermore, it is extremely unlikely that air traffic rules can ever be written so as to eliminate the need for good judgment in the planning and conduct of every flight.

Conformance with the following Good Operating Practices will greatly reduce traffic conflictions:

1. Use reasonable restraint in exercising the prerogatives of VFR flight, especially in terminal areas.

   The weather minimums and distances from clouds are minimums. Giving yourself a greater margin in specific instances is just good judgment.

   a. Conducting a VFR operation in a control zone when the official visibility is 3 or 4 miles is not prohibited, but good judgment would dictate that you keep out of the approach area.

   b. It has always been recognized that precipitation reduces forward visibility. Consequently, although again it may be perfectly legal to cancel your IFR flight plan at any time you can proceed VFR, it is good practice, when precipitation is occurring, to continue IFR operation into a terminal area until you are reasonably close to your destination.

   c. In conducting simulated instrument flights, be sure that the weather is good enough to compensate for the restricted visibility of the safety pilot or your greater concentration on your flight instruments. Give yourself a little greater margin when your flight path lies in or near a busy airway or close to an airport.

2. Be alert at all times, especially when the weather is good.

   Most pilots pay attention to business when they are operating in full IFR weather conditions, but strangely, air collisions almost invariably have occurred under ideal weather conditions. Unlimited visibility appears to encourage a sence of security which is not at all justified.

3. If you think another aircraft is getting too close to you, give way instead of waiting for the other pilot to respect the right-of-way to which you may be entitled.

   It is a lot safer to pursue the right-of-way angle after you have completed your flight.

4. Plan and conduct an IFR operation unless the weather is well above VFR minimums.

   When a flight cannot be completed safely under Visual Flight Rules is strictly a matter of judgment. Good judgment would dictate that you use this prerogative very conservatively

5. Use the Federal Airways.

   The establishment of the Federal Airways system costs the Government millions of dollars annually. The operation and maintenance of the system costs additional millions every year. Sure, you can stay off the airways most of the time during certain flights by electing to fly "direct," but why ignore the additional safety available in controlled airways?

6. Follow IFR procedures even when operating VFR.

   You don't have to follow IFR procedures if you are conducting a VFR operations, but you cannot maintain instrument proficiency without practicing at every opportunity. Use all the navigational aids available and make accurate position reports.

7. When conducting an IFR operation, make a written record of your ATC clearance.

   The specified conditions which are a part of your air traffic clearance may be somewhat different from those included in your flight plan. Additionally, air traffic control may find it necessary to add conditions, such as a particular departure route. The very fact that air traffic control specifies different or additional conditions means that other aircraft are involved in the traffic situation.

Conformance with the above Good Operating Practices is not as simple as it sounds. It requires constant attention to innumerable details and a deep-seated realization that additional hazards incident to flight operations exist whenever vigilance is relaxed.

(8-15-50)

AIR DEFENSE AREAS

PACIFIC OCEAN (WEST COAST) AIR DEFENSE AREAS: Effective Date June 1, 1950. In the interest of safety, all airmen proposing flight which will approach the West Coast of the United States from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area, between the Canadian - United States Border and the United States - Mexican Border are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Similarly, airmen flying coastwise in the Pacific Ocean Area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flight operations within the continental limits of the United States adjacent to the above described area, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline.

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York, or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

Note: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coastline are not affected by the above.

EASTERN CANADIAN BORDER AIR DEFENSE AREA: Effective Date May 5, 1950. In the interest of safety, all airmen proposing flight which will cross the Canadian Border, southbound, east of the 87th meridian, (Lake Michigan) are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to flight operations within the continental United States adjacent to this area or northbound flights crossing the Canadian Border.

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF LOS ALAMOS REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

SEATTLE-HANFORD AIR DEFENSE AREA: Effective Date May 5, 1950. The United States Air Force has activated an Air Defense Area in the northwest section of the United States. This area is bounded by a line drawn from the coast at North Bend, Oregon to Ontario, Oregon, northeast from Ontario, Oregon to Superior, Montana and from Superior, Montana north to the Canadian Border, thence westward along the Canadian - United States Border to the Pacific Ocean, south along the Pacific Coast to the point of beginning (North Bend, Oregon).

In the interest of safety, all airmen proposing flight which will approach the above described defended area, at any altitude, from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area or across the Canadian - United States Border, southbound, at any altitude, are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility.

Similarly, pilots flying coastwise adjacent to this area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner.

In addition, pilots of aircraft approaching this area from within the continental limits of the United States at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

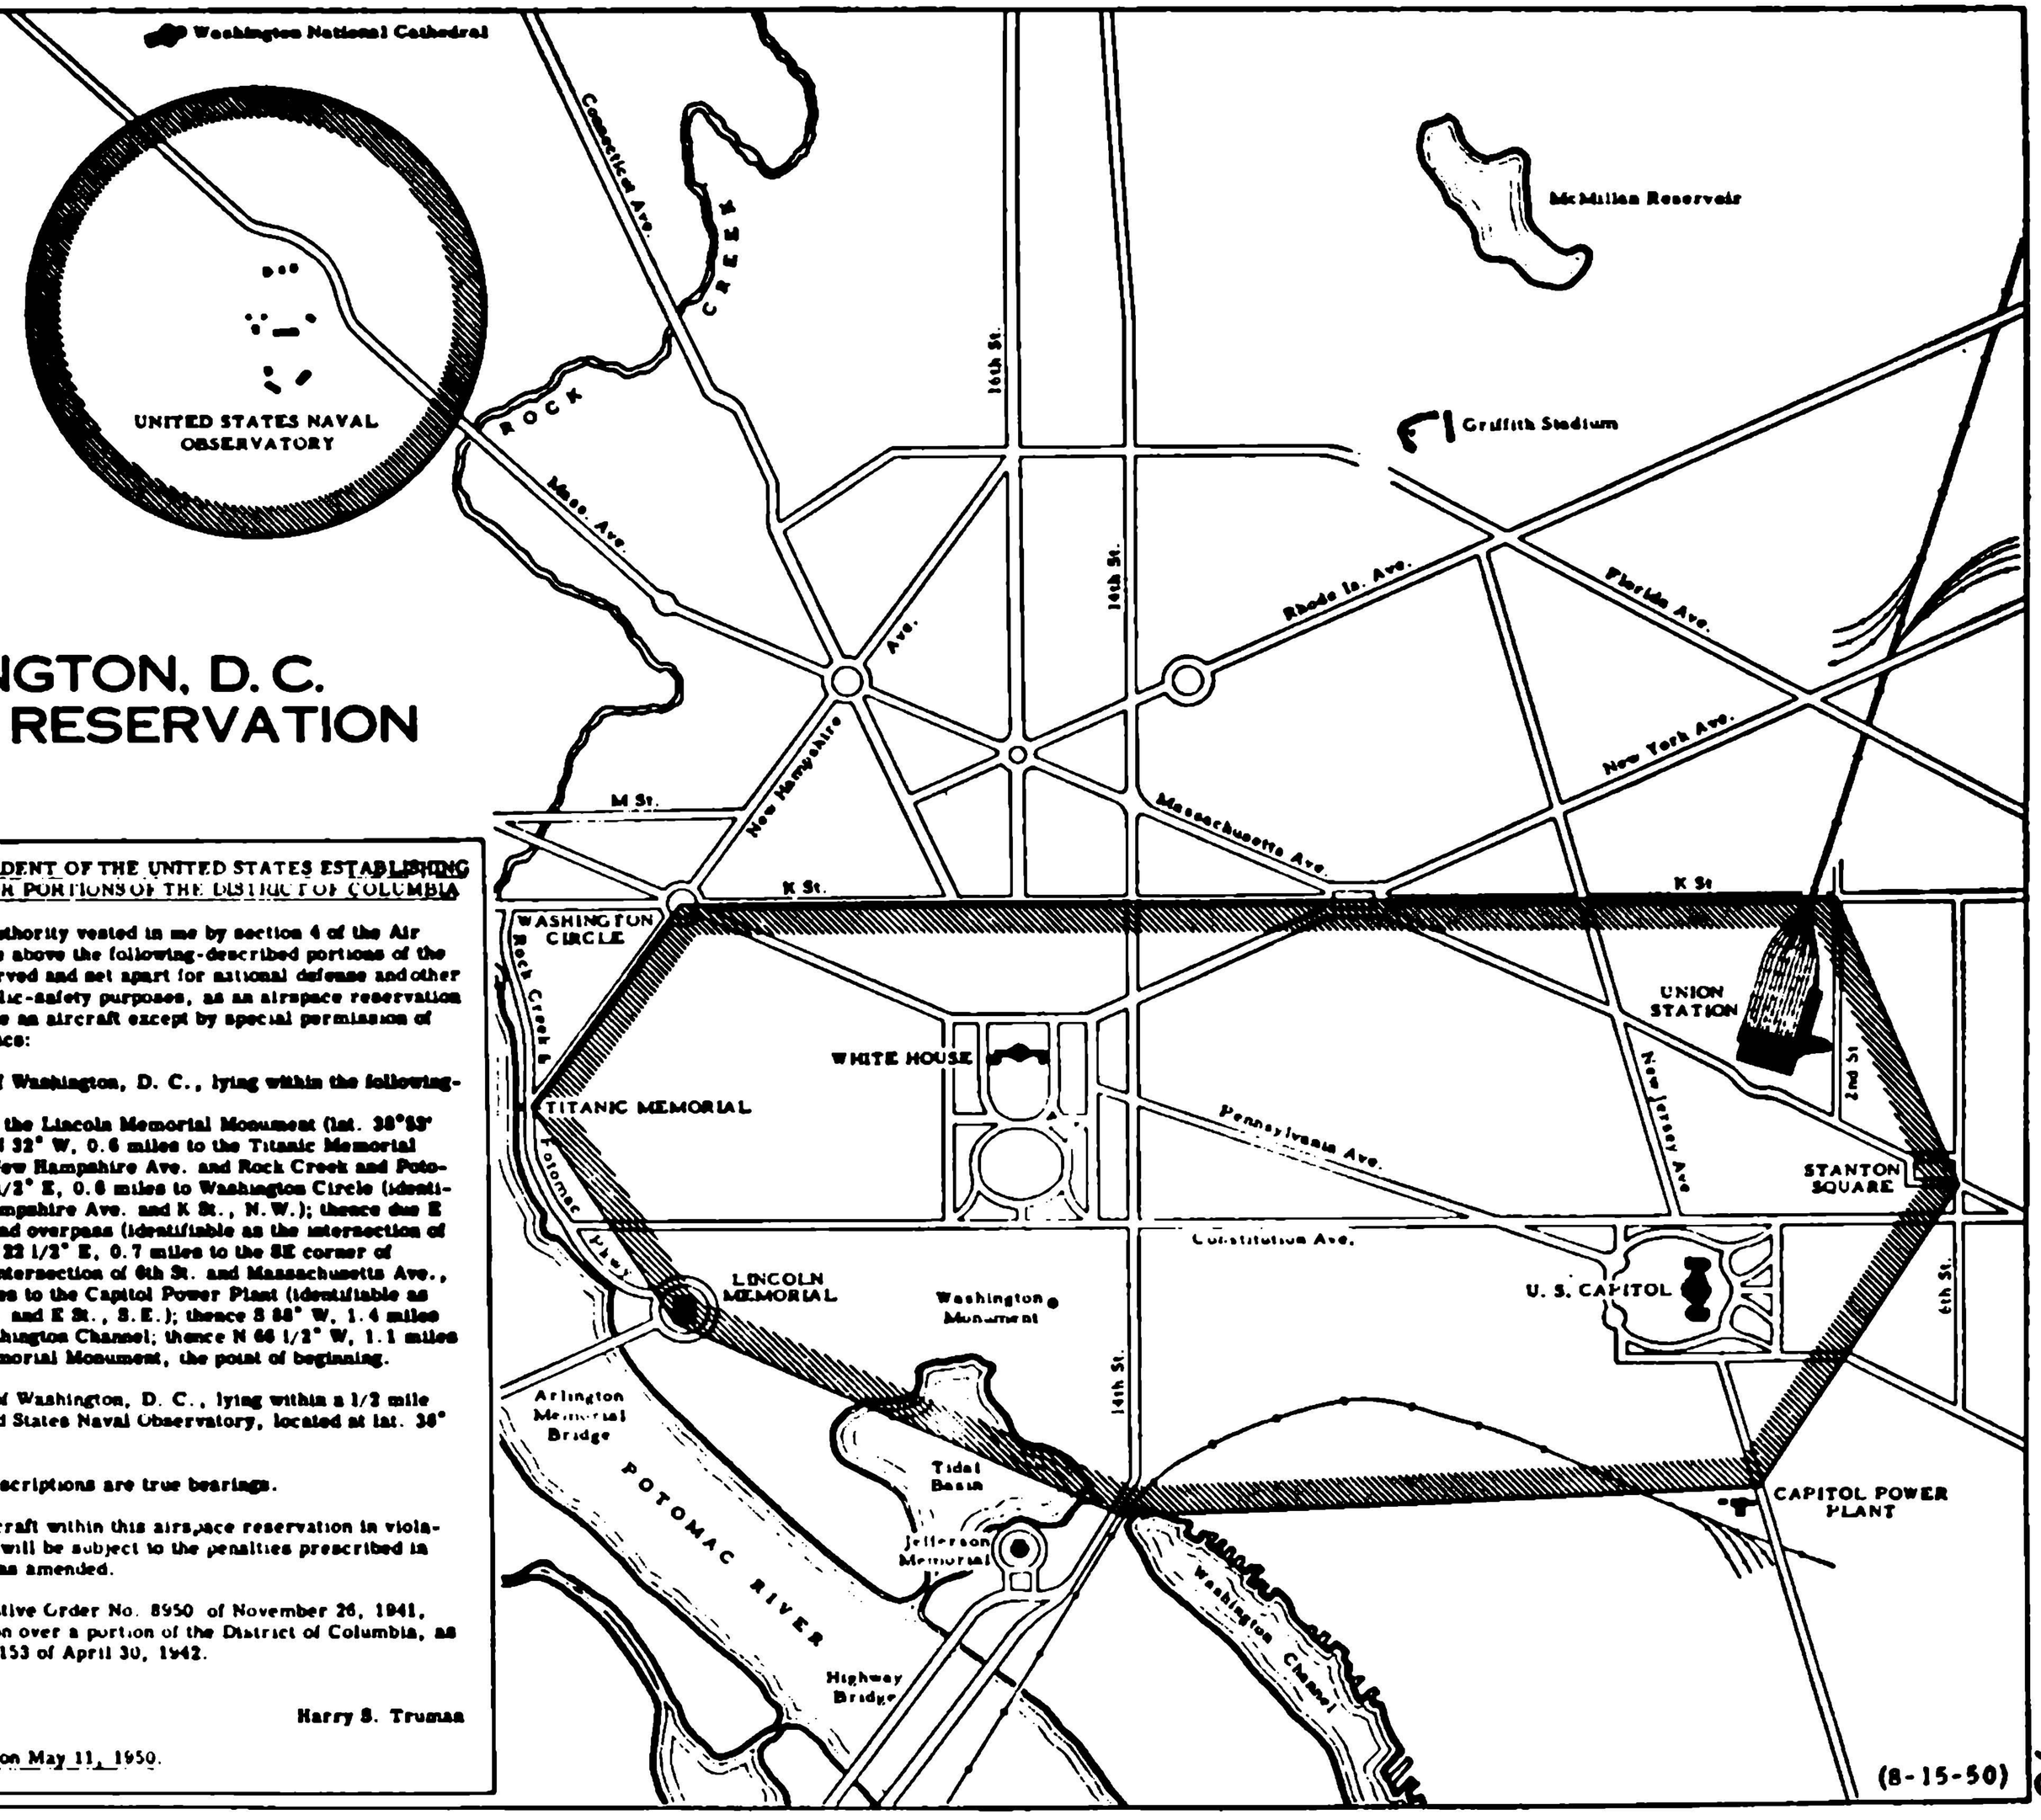
This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to aircraft operating within the continental limits of the United States, when flying at less than 10,000 feet MSL or 4,000 feet above the immediate terrain, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline.

THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF HANFORD, WASHINGTON REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

(8-15-50)

WASHINGTON, D. C.
AIRSPACE RESERVATION



EXECUTIVE ORDER OF THE PRESIDENT OF THE UNITED STATES ESTABLISHING AN AIRSPACE RESERVATION OVER PORTIONS OF THE DISTRICT OF COLUMBIA

By virtue of and pursuant to the authority vested in me by section 4 of the Air Commerce Act of 1926, the airspace above the following-described portions of the District of Columbia is hereby reserved and set apart for national defense and other governmental purposes, and for public-safety purposes, as an airspace reservation within which no person shall navigate an aircraft except by special permission of the Administrator of Civil Aeronautics:

1. All that area within the City of Washington, D. C., lying within the following-described boundaries:

Beginning at the SW corner of the Lincoln Memorial Monument (lat. 38°53' 21" N, long. 77°03'02" W); thence N 32° W, 0.6 miles to the Titanic Memorial (identifiable as the intersection of New Hampshire Ave. and Rock Creek and Potomac Parkway, N.W.); thence N 36 1/2° E, 0.8 miles to Washington Circle (identifiable as the intersection of New Hampshire Ave. and K St., N.W.); thence due E along K St., 2.5 miles to the railroad overpass (identifiable as the intersection of K St. with 2nd St., N.E.); thence S 22 1/2° E, 0.7 miles to the SE corner of Stanton Square (identifiable as the intersection of 6th St. and Massachusetts Ave., N.E.); thence S 33 1/2° W, 0.8 miles to the Capitol Power Plant (identifiable as the intersection of New Jersey Ave. and E St., S.E.); thence S 88° W, 1.4 miles to the railroad trestle over the Washington Channel; thence N 66 1/2° W, 1.1 miles to the SW corner of the Lincoln Memorial Monument, the point of beginning.

2. All that area within the City of Washington, D. C., lying within a 1/2 mile radius from the center of the United States Naval Observatory, located at lat. 38° 55'17" N, long. 77°04'02" W.

All bearings used in above descriptions are true bearings.

Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938, as amended.

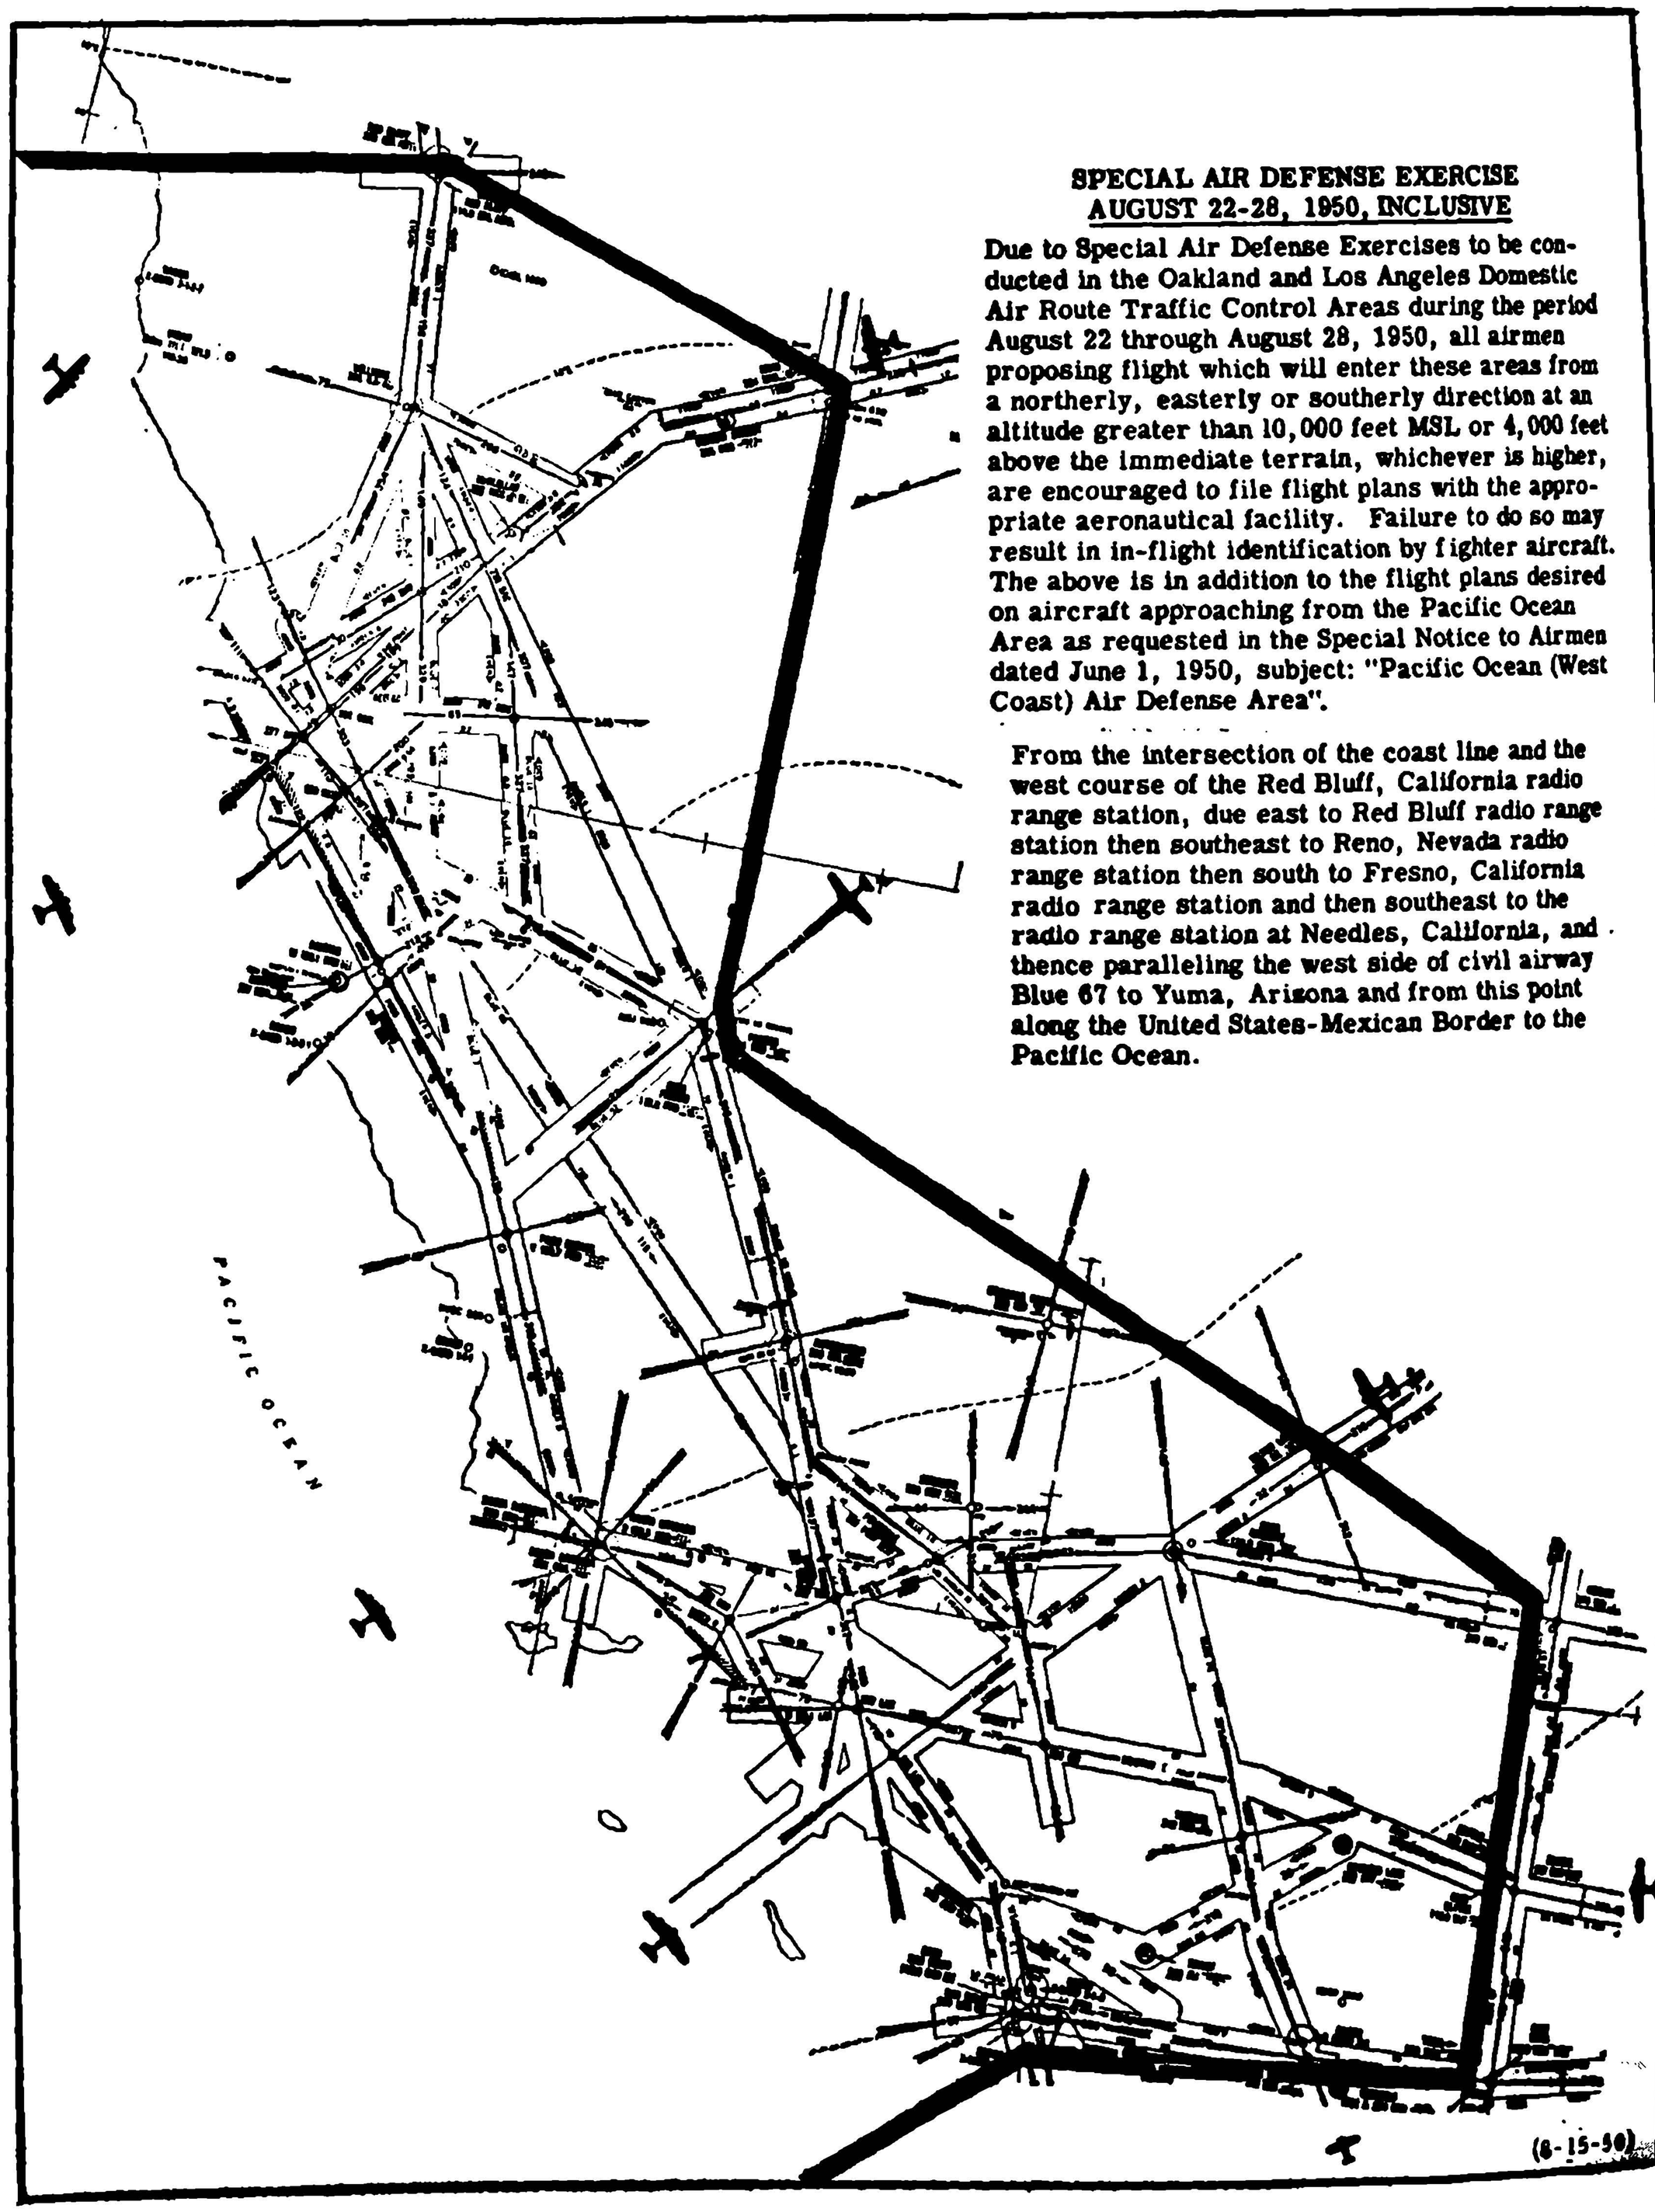
This order supersedes Executive Order No. 8950 of November 26, 1941, establishing an airspace reservation over a portion of the District of Columbia, as amended by Executive Order No. 9153 of April 30, 1942.

Harry S. Truman

This order became effective on May 11, 1950.

(8-15-50)

AIR DEFENSE EXERCISE



SPECIAL AIR DEFENSE EXERCISE
AUGUST 22-28, 1950, INCLUSIVE

Due to Special Air Defense Exercises to be conducted in the Oakland and Los Angeles Domestic Air Route Traffic Control Areas during the period August 22 through August 28, 1950, all airmen proposing flight which will enter these areas from a northerly, easterly or southerly direction at an altitude greater than 10,000 feet MSL or 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans with the appropriate aeronautical facility. Failure to do so may result in in-flight identification by fighter aircraft. The above is in addition to the flight plans desired on aircraft approaching from the Pacific Ocean Area as requested in the Special Notice to Airmen dated June 1, 1950, subject: "Pacific Ocean (West Coast) Air Defense Area".

From the intersection of the coast line and the west course of the Red Bluff, California radio range station, due east to Red Bluff radio range station then southeast to Reno, Nevada radio range station then south to Fresno, California radio range station and then southeast to the radio range station at Needles, California, and thence paralleling the west side of civil airway Blue 67 to Yuma, Arizona and from this point along the United States-Mexican Border to the Pacific Ocean.

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
# = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
* = Air Force guard 4495,4708,3117.5 kc and 121.5 mc.
(D) = Day. (N) = Night.
→ = New or revised data.

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. LMM's, LOM's are at the same locations as the middle and outer markers unless otherwise specified. →New or revised data. + =additional data will be found in Notices to Airmen section. •Continuous dots. <
(8-29-50)
(BC-8)=Lclzr back course non-standard and usable only to 8 mi.(BC-unusable)=Back course unusable.

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . .VHF middle marker
LMM. . .Compass locator station when combined with middle marker of ILS
MOR. . .Low frequency omni-directional range
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
LOM. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. See page 58 for list of CAA INSACs which stand watch on 3117.5 kc.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-U.S. Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-U.S. Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport. If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Low intensity runway
5 - Low intensity instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:
A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft..

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications.", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif. . or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB. Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:

Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Stations)
E...( )	4...( )	E...( )		Tactical or as required
			4...118.1	International airdrome control towers
F...( )	5...( )	F...( )		Tactical or as required
			5...143.28	General Communications
G...137.70	6...143.64	G...142.02	6...143.64	GCA
H...134.1	7...142.02	H...134.64	7...142.02	GCA
	8...134.64		8...134.1	GCA
	9...126.18		9...126.18	Control towers
Guard.... 121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT:

Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11. 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec. 1, 1949; Location Identifiers, Third Edition, Sept 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept. 1, 1948, with two revisions.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan 24, 1950; Teletype Maps: M-10, Jan 1, 1949; M-11, Dec 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP IV MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Hq, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

✓ CHANGES FOR AN 08-15-2: Page 61, change listings of Air Rescue Squadrons and Flights as follows:

1st Rescue Sq. MacDill AF Base Florida	Tampa H-8811 Ext. 628	Flt "B",5th Rescue Sq. Ellington AF Base Houston, Texas	MI-2411 Ext. 167 or 169
4th Rescue Sq. Hamilton AF Base Hamilton, Calif.	Ignacio 5800 Ext. 3227-3228	Flt "C",5th Rescue Sq. Maxwell AF Base Alabama	Maxwell AFB Ext. 6157
Flt "B",4th Rescue Sq. March AF Base California	Moreno LD 20 Ext. 4206	Flt "D",5th Rescue Sq. Selfridge AF Base Michigan	Mt.Clemens 2511 Ext. 3105
Flt "C",4th Rescue Sq. McChord AF Base Washington	Lakewood 2121 Ext. 5144-5126	6th Rescue Sq. Westover AF Base Massachusetts	Chicopee 1740
5th Rescue Sq. Lowry AF Base Denver, Colo.	Dexter 8581 Ext. 820-898		

✓ CHANGES FOR USAF PILOT'S HANDBOOK, SPECIAL JET - U. S.: (1) Tyndall AF Base, Panama City. The following jet letdown procedures have been approved utilizing radio fixes as listed below. Ceiling 2000'. Visibility 3 miles. Obtain clearance for letdown through Tyndall tower in each instance.

Tallahassee Range. Initial approach at assigned altitude (normally 20,000' or above). Maintain level flight on heading of 245° at last assigned altitude or 500' on top, whichever is lower, for two minutes after crossing range. Descend on heading of 245° to 1500' within 50 miles from Tallahassee radio range. If VFR at 1500', proceed to Tyndall AF Base.

Crestview Range. Initial approach at assigned altitude (20,000' or above). Maintain level flight for three minutes on magnetic heading of 83° from radio range. Turn to magnetic heading of 143°, maintain level flight for two minutes at last assigned altitude or 500' on top, whichever is lower, while on Red 30 Airway. Descend on course of 143° to 1500' within 30 miles from Red 30 Airway.

Dothan Range. Initial approach at assigned altitude (normally 20,000' or above). Maintain level flight on heading of 178° at last assigned altitude or 500' on top, whichever is lower, until south of Red 30 Airway. Descend on heading of 178° to 1500' within 30 miles from Red 30 Airway. If VFR at 1500', continue to Tyndall AF Base. If not VFR at 1500', aircraft will in each case proceed to Tyndall range, using radio compass. If not VFR at 1500 over rng, single aircraft will contact Tyndall tower for GCA or range letdown instructions. Formations will hold min alt and letdown heading until three minutes after passing range, climb to 500' on top or designated altitude and proceed to alternate.

(2) X-JAL-32. Great Falls AFB, Great Falls, Mont. Flight will cross range station on magnetic heading of 233°. Make 180° procedure turn, planning turn to recross radio range on heading of 33° at 14,000' MSL or 500' on top, whichever is lower. Maintain this altitude and heading for two minutes and letdown on heading of 33°. Report to Great Falls Approach Control when reaching VFR or at 7000' if not VFR. If not VFR at 7000', make 180° turn, rehome on Great Falls range at 7000' and contact Great Falls Approach Control for further instructions.

(3) Turner AFB, Albany, Ga. JAL-54. Change ceiling to 2000'.

(4) JAL-17. Miami International Airport, Miami, Fla. Obtain clearance through Miami Approach Control. Change initial approach and letdown heading to 235°. Ceiling 2500'. When VFR, report to Miami Approach Control. If not VFR at 2000', make 180° turn and contact Miami Approach Control. Home on Miami radio range.

✓ CHANGES FOR USAF PILOT'S HANDBOOK (EAST) - U. S.: (1) AL-329. Portland Mun., Maine. Change initial approach altitudes for SE and SW courses to Min. en route alt.

(2) AL-314. NAS Patuxent River, Patuxent River, Md. Add approach altitude on SW crs of 1000' from S crs Andrews (Final).

(3) AL-146. Columbus, Lawson AFB, Ga. LF rng flight checked and found reliable. Courses realigned to former headings: 201, 291, 21, 111.

(4) AL-131. Elmira, Chemung Co. Arpt, N. Y. NE course LF radio range realigned to 236° magnetic and toward station.

(5) AL-387. Selma, Alabama (Craig AFB). Change LF radio range headings to 232, 322, 052, 142 magnetic and toward station. Add 2 degrees to all former quadrant besector headings and procedure turn headings.

(6) AL-276. Selfridge AFB, Mt. Clemens, Mich. Indicate St. Clair FM 4.8 miles south of range station on S course. Ceiling over field 500'. Min alt 1083'. Missed approach procedure: If visual contact not established at authorized landing minimums within 5.6 miles after passing radio range or if landing not accomplished, climb to 2500' on heading of 70°. Contact Selfridge approach control for further clearance. Indicate emergency alt. 2500'.

✓ CHANGES FOR PILOT'S HANDBOOK, (WEST) - U. S.: (1) AL-588. Butte Arpt, Butte, Mont. Make notation that initial approach altitudes for procedure 2 utilizing Whitehall range are: N course 10,500' from Helena range station, E course 9000' from Bozeman range station, S course 10,500' from Dillon range station, NW course 10,000' from Butte range station. Altitude over Homestake FM on final approach 9500'. Missed approach procedure (Procedure 2): Proceed to Butte radio range and climb to 10,000' before reaching Butte range station.

(2) AL-345. Roberts Field, Redmond, Oregon. Change initial approach on S course to 10,000' from LMT range. Missed approach procedure: If visual contact not established at authorized landing minimums within 4.3 miles after passing Redmond range station, or if landing not accomplished, turn right and climb to 7000' on S course within 15 miles of range station.

(3) AL-322. Sky Harbor Arpt, Phoenix, Ariz. Delete approach altitude on the E course of 2100' from Mesa FM (Final).

(4) Omaha, Nebr., Offutt AFB. The following new ADF procedure is authorized for inclusion in book, utilizing Offutt homer, frequency 296 kc, identification OFF. Initial approach to station: From Omaha radio to MH, 164°, 16.8 mi., Min. alt.: 2500'. From Glenwood FM to MH, 300°, 13.2 miles, Min. alt.: 2500'. Final approach track: 210° magnetic outbound, 30° magnetic inbound. Procedure turn: Left side of track within 25 miles at 2500'. Alt. over Offutt Homer on final approach: 2000'. Bearing and distance, station to field: 348°, .26 mi. Elevation of field: 1046'. Ceiling: 954'. Min. alt. over field: 2000'. Visibility: Day- 1-1/2 mi., Night- 2 mi. If visual contact not established at authorized landing minimums upon reaching Offutt Homer or if landing not accomplished, make right turn and climb to 2500' on magnetic track of 200° within 25 miles. Remarks: Contact Omaha Approach Control on Channel B for all clearances. Radio tower, elevation 1620' 4 miles 267° from homer.

(5) AL-376. ADF Hamilton AFB, San Rafael, Calif. Correct new procedure of July 21, 1950, by marking: PROCEDURE NOT APPROVED FOR USE BY AIR FORCE AIRCRAFT EXCEPT IN EMERGENCY. (8-29-50)

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in, or over, Canadian territory.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 kc: All CAA airway communications stations other than those listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

Acomita, N.M.
Akron, Colo.
Battle Mt., Nev.
Butler, Mo.
Columbia, Mo.
Dalhart, Texas
Dodge City, Kans.
Dyersburg, Tenn.
Eagle, Colo.

Worcester, Mass. (Gardner)
Zanesville, Ohio
Zuni, N.M.

Locations in parenthesis are controlled from listed stations.

COMPASS LOCATOR SYMBOLS: To conform with ICAO standards the letter "L" is now in use as the abbreviation denoting a compass locator. This replaces the "CL" or "K" as used in the past on charts or in the Airman's Guide. "OMK" now becomes "LOM"; "MMK" now becomes "LMM"; "IMK" becomes "LIM".

The abbreviation "L" as used in the Airman's Guide indicated L/MF voice facility on other than range frequency. This now becomes "J".

See Radio Class Designations, Page VI.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of const, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

(8-29-50)

THE FOLLOWING BEACON SITES WILL BE DISCONTINUED SEPTEMBER 30, 1950:

ATL-LGA	SITE
Blackstone, Va.	42
Riverdale, Md.	57A
Glenburnie, Md.	58
BNA-DCA	
Pine Ridge, Va.	33A
Dublin, Va.	35B

Coatesville, Pa.	37B
DCA-CLE	
Moon Run, Pa.	19
Clinton, Pa.	20
LGA-BOS	
New Haven, Conn.	7
Cromwell, Conn.	H1
Wellesley Hills, Mass.	18

The above sites are all located in the First CAA Region. See Notices To Airmen for additional sites to be discontinued in the near future.

INSTRUCTIONS FOR MONITORING ILS: **Communications should be established with the appropriate control twr or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.**

✓DANGER AREA DESIGNATION: **The following amendment is effective when indicated unless otherwise advised.**

AMENDMENT No. 48 (September 8, 1950)

The Lighthouse Rocks, Kodiak, Alaska, area is added to read: Location: Lighthouse Rock, Kodiak, Alaska, (WAC 136); Description: A circular area having a radius of 5 miles centered at lat. 55-47-00 N, long. 157-26-00 W; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Commander, Naval Air Bases, Seventeenth Naval District, Kodiak, Alaska.

✓ON-REQUEST REPORTING POINTS: **Effective immediately the following on-request** reporting points are established:

(1) Stansbury **Intersection. The intersection of the W course of the Salt Lake LF Radio** Range and a 335° **magnetic ADF track to the Promontory Point HW facility. The point of** intersection being **located 21.5 miles W of the Salt Lake LF Radio Range Station on the W** course of the Salt **Lake Radio Range at lat. 40-47 N, long. 112-23 W.**

(2) Spring Bay **Intersection. The intersection of a 309° magnetic ADF track from** Promontory Point HW facility **and a 75° magnetic ADF track to the Corinne HW facility. The** point of intersection **being at** lat. **41-34-30 N, long. 112-46-00 W.**

(3) Vicente **Intersection. The intersection of the SE course of the Camarillo Radio Range and a track of 205° magnetic from the Los Angeles LF Radio Range, located at approximately lat. 33-41-00 N, long. 118-34-45 W.**

✓AIRSPACE WARNING AREAS: **Because of the redesignation of the Norfolk ICAO Control Area (No. 1149) to a Control Area (Domestic), and to the designation of a Control Area (Domestic) and ICAO Control Area via the SE course of the Weeksville, N. Carolina range, the following offshore Airspace Warning Areas are revised and redefined:**

(1) Chincoteague - Virginia Capes and Norfolk Offshore Airspace Warning Areas: Beginning at lat 38-45, 2 miles E of the E boundary of Amber Airway No. 9, E to a point 2 nautical mi SW of the SW boundary of ICAO Control Area No. 1148, SE, paralleling said Control Area to a point 2 nautical mi W of the W boundary of the New York Oceanic ATC Area, due S paralleling the W boundary of the New York Oceanic ATC Area to lat. 36-33-30 due W to a point 3 nautical mi from the U. S. shoreline, northerly paralleling the shoreline to a point 2 nautical mi S of the S boundary of the Norfolk Control Area, due E paralleling said Control Area to lat 36-49-25, long 75-32, due N to lat 37-02-15, due W paralleling said Control Area to long. 75-55, due N to a point 3 nautical mi E of the U. S. shoreline (vicinity of Smith Is.), northeasterly, paralleling the shoreline to a point 2 nautical mi E of the E boundary of Amber Airway No. 9 (vicinity of Bethany Beach, Dela.), northeasterly, paralleling said airway to lat 38-45, point of beginning, excluding those portions overlapping the Ship Shoal and Bethany Beach Danger Areas.

(2) North Carolina Airspace Warning Area: Beginning at lat. 36-00, long. 75-34-30, due E to long. 74-00, due S to lat. 35-15-30, due W to long. 74-37-15, NW to lat. 35-56-40, long. 75-32-40, northwesterly, 3 nautical mi from and parallel to the shoreline to the point of beginning.

✓CORRECTION TO AERONAUTICAL CHART: **Correct RF Chart 26, dated August 2, 1950, by deleting transmitting and receiving frequency 142.72 mc from Westfield, Massachusetts tower.**

✓REDESIGNATION OF OCEANIC CONTROL AREAS: **Effective 0001Z, October 1, 1950, the Miami, New York and New Orleans oceanic control areas are redesignated as follows:**

(1) Miami Oceanic Control Area - Area One, 24-00 N, 83-60 W to 27-40 N, 83-45 W to 27-40 N 86-00 W to 24-00 N 86-00 W to point of beginning. Area Two, 24-40 N 79-00 W to 27-00 N 79-00 W, including an area encompassed by an arc with a radius of 15 miles centered on West end Bahamas Aerodrome, to 27-00 N 78-00 W to 30-00 N 78-00 W to 30-00 N 73-00 W to 27-00 N 71-00 W to 20-25 N 71-00 W to 20-25 N 73-00 W to point of beginning. Lower limit of control areas will be 2500' except 6000' within the limits of the Nassau Control Area.

(2) New York Oceanic Control Area will be enlarged to include the area commencing at a point 30-00 N 73-00 W to 27-00 N 71-00 W thence across the 27th parallel to a point 27-00 N 60-00 W and then to 30-00 N 60-00 W. North Atlantic Regional ICAO Procedures and Regulations will be used.

(3) New Orleans Oceanic Control Area, from 23-00 N 96-00 W to 27-00 N 96-00 W to 28-15 N 94-00 W to 28-15 N 89-00 W to 29-25 N 87-00 W to 29-00 N 84-00 W to 27-40 N 83-45 W to 27-40 N 86-00 W to 24-00 N 86-00 W to 23-00 N 87-00 W to 23-00 N 96-00 W. Lower limits of control area will be 2500' with no upper limits.

✓DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES AND REPORTING POINTS: **Effective** 0001 E.S.T. September 5, 1950, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS. **(1) Red Civil Airway no. 59 is amended to read: (Garden City, Kans. to Oklahoma City, Okla.) From the Garden City, Kans. rdo rng stn via the intersection of the S crs of the Garden City, Kans. rdo rng and the NW crs of the Gage, Okla. rdo rng; the Gage, Okla. rdo rng stn to the Oklahoma City, Okla. rdo rng stn.**

(2) Red Civil Airway no. 94 is added to read: (Providence, R. I. to Hyannis, Mass.) From the Providence, R. I. rdo rng stn via the Otis AFB, Falmouth, Mass. non-directional rdo bcn (FMH) to the Hyannis, Mass. non-directional rdo bcn, excluding that portion which lies more than 2 mi N of the centerline between the intersection of the E course of the Providence rdo rng and the NE crs of the Quonset Point, R. I. (Navy) rdo rng and the Otis AFB (FMH) non-directional rdo bcn and excluding that portion which lies more than 4 mi N of the centerline between the Otis AFB (FMH) non-directional rdo bcn and the Hyannis, Mass. non-directional rdo bcn.

(3) Blue Civil Airway no. 69 is amended to read: (St. Louis, Mo. to Des Moines, Iowa) From the intersection of the N crs of the St. Louis, Mo. rdo rng and the SW crs of the Springfield, Ill. rdo rng via the Quincy, Ill. non-directional rdo bcn; the Ottumwa, Iowa non-directional rdo bcn to the Des Moines, Iowa rdo rng stn.

(4) Blue Civil Airway no. 71 is added to read: (Toledo, Wash. to Seattle, Wash.) From the Toledo, Wash. rdo rng stn via the Shelton, Wash. rdo rng stn to the Seattle, Wash. rdo rng stn.

CONTROL AREAS: **(1) Red Civil Airway no. 59 (Garden City, Kans. to Oklahoma City, Okla.) (CAPTION CHANGE)**

(2) Red Civil Airway No. 94 is added to read: (Providence, R.I. to Hyannis, Mass.) All of Red Civil Airway No. 94.

(8-29-50)

(3) Blue Civil Airway No. 69 is amended to read: (St. Louis, Mo. to Des Moines, Iowa) All of Blue civil airway No. 69.

(4) Blue Civil Airway No. 71 is added to read: (Toledo, Wash. to Seattle, Wash.) All of Blue civil airway No. 71.

CONTROL AREA EXTENSIONS: (1) Control area extension Ottumwa, Iowa is added to read: From the Ottumwa, Iowa non-directional rdo bcn extending 5 mi either side of a bearing 180° magnetic from the non-directional rdo bcn to a point 20 mi S of the radio bcn.

(2) Control area extension Seattle, Wash. is added to read: All that area SW of the Seattle, Wash. rdo rng stn bounded on the N and W by Blue Civil Airway No. 71 and on the E by Amber Civil Airway No. 1, excluding the Fort Lewis, Wash. danger area.

(3) Control area extension Norfolk, Va. is amended to read: From the Norfolk, Va. (Navy) radio rng stn extending 5 mi either side of the E course of the Norfolk, Va. Navy rdo rng to its intersection with the S crs of the Chincoteague, Va. (Navy) rdo rng, excluding that portion below 2000'.

(4) Control area extension San Antonio, Tex. is added toread: Within a 10 mi radius of the Randolph AFB rdo rng stn, excluding that portion which overlaps Amber Civil Airway No. 4.

(5) Control area extension Elizabeth City, N. C. is added to read: That area within tangent lines drawn from the circumference of a circle 5 mi in radius centered on the Weeksville, N.C. (Navy) rdo rng stn to a circle 10 mi in radius centered on the intersection of the SE crs of the Wecksville (Navy) rdo rng and the western boundary of the New York Oceanic Control Area, excluding that portion below 2000' which lies outside the continental limits of the United States.

(6) Control Area extension Enid, Okla. is added to read: From the Enid, Okla. Vance AFB rdo rng stn extending 5 mi either side of the NW crs of the rdo rng to the southern boundary of Green Civil Airway No. 4, extending 5 mi either side of the NE crs of the rdo rng to the western boundary of Blue Civil Airway No. 5, extending 5 miles either side of the SE crs of the rdo rng to the western boundary of Blue Civil Airway No. 5, and extending 5 mi either side of the SW crs of the rdo rng to a point 25 mi SW of the Vance AFB rdo rng stn.

CONTROL ZONES: (1) Ontario, Calif. control zone is added to read: Within a 5 mi radius of the Ontario, Calif. International Airport extending 2 mi either side of a bearing 74° magnetic from the arpt to a point 15 mi E of the arpt.

(2) Ottumwa, Iowa control zone is added to read: Within a 5 mi radius of the Ottumwa Airport extending 2 mi either side of a bearing 180° magnetic from the Ottumwa non-directional rdo bcn to a point 10 mi S of the arpt.

(3) Fort Dix, N. J. control zone is added to read: Within a 7 mi radius of the McGuire AFB extending 5 mi either side of the SW crs of the McGuire AFB rdo rng to a point 10 mi SW of the rdo rng stn, excluding that portion which overlaps Red Civil Airway No. 3, the Fort Dix, N. J. danger area and the Lakehurst, N. J. caution area.

(4) Enid, Okla. control zone is added to read: Within a 5 mi radius of the Vance AFB extending 2 mi either side of the NE crs of the Vance AFB rdo rng to a point 10 mi NE of rng.

REPORTING POINTS: (1) Red Civil Airway No. 59 (Garden City, Kans. to Oklahoma City, Okla.) (CAPTION CHANGE)

(2) Red Civil Airway No. 94 is added to read: (Providence, R.I. to Hyannis, Mass.) No reporting point designation.

(3) Blue Civil Airway No. 71 is added to read: (Toledo, Wash. to Seattle, Wash.) No reporting point designation.

EFFECTIVE DATE CHANGE TO AMENDMENTS TO CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES AND REPORTING POINTS PUBLISHED IN AIRMAN'S GUIDE, VOL. 5, NO. 10, DATED AUGUST 1, 1950: The effective date of the above amendments is changed from 0001 E.S.T. August 31, 1950 to 0001 E.S.T. September 5, 1950.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ANNISTON ARPT: Ctn-strips being extended. (8-8)

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) Crash and rescue facs avail 2400-0700 on 1 hr req to NAS (5-30)

BROOKLEY AFB (MOBILE): Rnwy 14-32 clsd 0700-1600, Mon-Fri (const). (6-30)

CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)

DEMOPOLIS ARPT: 198' rdo twr being erected 10 mi E (95°T) at lat 32-27-06, long. 87-46-30. (6-25)

EVERGREEN-MIDDLETON ARPT, SITE 20, MSY-ATL: Ctn- vehicles on fld intermittently. Rnwys, taxi strips being used as access road to adj lnd. (5-30)

LANETT-VALLEY ARPT: NE/SW Strip clsd (const). (8-8)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17) Rnwy 8-26 clsd until approx Sept 2, installing lgtg sys. (8-8).

TUSCALOOSA-VAN DE GRAAFF ARPT: 30' lgtd gravel washer 400' E of E bndry. (7-25)

ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, afct parked on rnwys. Rnwy 8-26 clsd. (6-27)

PHOENIX-SKY HARBOR ARPT: Use rnwys only. Ctl twr being erected approx 800' N of intsxn of Rnwy 12-30 and N/S Taxiway. Ctn - equip crossing taxiway. Rnwy 12-30 clsd. (6-23)

TUCSON ARPT: Rnwy 17-35 clsd. (7-19)

ARKANSAS: BATESVILLE ARPT: Const. Use N/S Rnwy only. (8-25)

BENTONVILLE ARPT: Strip under const. Use taxi strip for lndg. (6-28)

EL DORADO-GOODWIN ARPT: All rnwys lgts inop. (8-28)

FT. SMITH-RADIO: Soon omnirng on 113.1 mc shut down - moderization. (7-17)

FT. SMITH ARPT: Const W end E/W Rnwy. Use N/S Rnwy. (8-28)

JONESBORO ARPT: 233' twr being erected 4.5 mi WNW (292°T) at lat 35-51-17, long. 90-43-40. (8-18)

LITTLE ROCK-ADAMS FLD: Ctn - rnwys under const. (6-22)

REYNO ARPT: Correct lat 36-19-30, long. 90-46-00. (7-14)

CALIFORNIA: ★ARCATA-RADIO: Rcvr on 4495 kc comm Aug 29. These data rcvd too late for inclusion on ANRA page. About Aug 31, New LMM fac 233 kc will be comm at MM site 0.68mi from SE end NW/SE Rnwy on extended centerline. Concurrently LOM freq will be changed from 414 kc to 257kc and LIM 404 kc decomm. LMM and LOM will be monitor. and oper cont (6-20)

BAKERSFIELD-RADIO: Omnirng not usuable between 90 and 130° from stn - scalloping.

BAKERSFIELD-KERN CO. #1 ARPT: When ctl twr inop tetrahedron will be free swinging. Rnwy 12-30 will be lgtd. (8-5)

BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. NE/SW, E/W Strips clsd. (5-30)

BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3)

CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.

CAMARILLO-RADIO: LF rng on 359 kc S crs displaced 3° E. (8-1)

CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)

CLARKSBURG, BORGES-CLARKSBURG ARPT: Correct lat 38-26-30, long. 121-30-30. (6-8)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Albuquerque	New Orleans	WAC 410	Atlanta Local
Austin	Oklahoma City	WAC 466	Miami Local
Beaumont	Phoenix	WAC 467	Washington Local
Dallas	Prescott	WAC 468	FC 175
Del Rio	San Antonio	WAC 525	
Mobile	WAC 408	23DF	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

DROPPED CHART

AL 16 ADF

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Automatic Direction Finding approach charts, 5 cents each, by number with prefix (ADF); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts. (8-29-50)

PACIFIC OCEAN (WEST COAST) AIR DEFENSE AREAS: Effective Date June 1, 1950. In the interest of safety, all airmen proposing flight which will approach the West Coast of the United States from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area, between the Canadian-United States Border and the United States-Mexican Border are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Similarly, airmen flying coastwise in the Pacific Ocean Area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flight operations within the continental limits of the United States adjacent to the above described area, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline.

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York, or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

Note: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coastline are not affected by the above.

EASTERN CANADIAN BORDER AIR DEFENSE AREA: Effective Date May 5, 1950. In the interest of safety, all airmen proposing flight which will cross the Canadian Border, southbound, east of the 87th meridian (Lake Michigan are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to flight operations within the continental United States adjacent to this area or northbound flights crossing the Canadian Border.

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF LOS ALAMOS REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

SEATTLE-HANFORD AIR DEFENSE AREA: Effective Date May 5, 1950. The United States Air Force has activated an Air Defense Area in the northwest section of the United States. This area is bounded by a line drawn from the coast at North Bend, Oregon to Ontario, Oregon, northeast from Ontario, Oregon to Superior, Montana and from Superior, Montana north to the Canadian Border, thence westward along the Canadian-United States Border to the Pacific Ocean, south along the Pacific Coast to the point of beginning (North Bend, Oregon).

In the interest of safety, all airmen proposing flight which will approach the above described defended area, at any altitude, from a distance greater than 20 nautical miles (23 statute miles) in the Pacific Ocean Area or across the Canadian-United States Border, southbound, at any altitude, are encouraged to file flight plans, preferably IFR, with the appropriate aeronautical facility.

Similarly, pilots flying coastwise adjacent to this area more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner.

In addition, pilots of aircraft approaching this area from within the continental limits of the United States at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

This NOTAM does not relieve the individual pilot of his responsibility with respect to the customs and immigration requirements.

This NOTAM does not apply to aircraft operating within the continental limits of the United States, when flying less than 10,000 feet MSL or 4,000 feet above the immediate terrain, or aircraft operating less than 20 nautical miles (23 statute miles) seaward from the coastline. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF HANFORD, WASHINGTON REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

OAK RIDGE AIR DEFENSE AREA: Effective Date June 27, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Oak Ridge, Tennessee, (excluding the area lying within and north of Civil Airway Red 11, the area within 10 miles of Godman, Kentucky range station, the area lying within and southeast of Civil Airway Green 6, the area within 30 miles of Atlanta, Georgia range station and that portion of Civil Airway Red 10 between Atlanta, Georgia and Birmingham, Alabama) at an altitude greater than 6,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft.

This NOTAM does not apply to flights operating within the area at less than 6,000 feet MSL or less than 4,000 feet above the immediate terrain. THE EXISTING PROHIBITED AREA IN THE IMMEDIATE VICINITY OF OAK RIDGE REMAINS OUT OF BOUNDS FOR ALL AIR TRAFFIC.

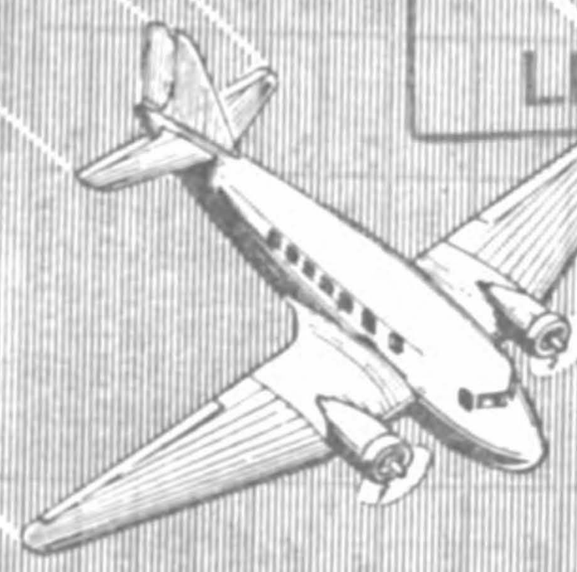
CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

AIRMAN'S GUIDE



DIRECTORY OF AIRPORTS — Pages 1 through 55

RADIO FACILITY DATA — Pages IV through XIX

NOTICES TO AIRMEN — Pages 56 through 76

VOL. 5, NO. 13 . SEPTEMBER 12, 1950

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

The printing of this publication has been approved by the Director of the Bureau of the Budget, March 28, 1950

For sale by Superintendent of Documents, U.S. Government Printing Office Washington 25, D.C. - Price 25 cents per copy, $6.00 per year.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

EXPERIMENTAL UNIT

Arcata, Calif.	**DISCONTINUED**

LEGEND

- G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
- HF = 3475,4890,6640 kc.
- # = Guards all VHF frequencies station transmits.
- (E) = Emergency use, as 121.5 (E).
- ** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
- * = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.
- (D) = Day. (N) = Night.
- → = New or revised data.

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. LMM's, LOM's are at the same locations as the middle and outer markers unless otherwise specified. →New or revised data. + =additional data will be found in Notices to Airmen section. *Continuous dots.

(9-12-50)

(BC-8)=Lclzr back course non-standard and usable only to 8 mi.(BC-unusable)=Back course unusable.

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 57.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
V = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . .VHF middle marker
LMM. . Compass locator station when combined with middle marker of ILS
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. See page 58 for list of CAA INSACs which stand watch on 3117.5 kc.
2. Range courses are magnetic in-bearings.
3. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
4. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
5. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-U.S. Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-U.S. Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

- h - runway is paved (concrete, asphalt or similar type of paving)
- aw - allway field
- (26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(d) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide," published by MATS and now distributed to all AF bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD:

Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT. The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 through 103, A N 6e 15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational and communications services, particularly when standard low frequency facilities are not available.

1/ CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION. The following are those which are now effective and are established under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL. II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8, and II-B-11), Contractions, Fourth Edition, December 1, 1949, Location Identifiers, Fourth Edition, July 1, 1950.

GROUP IV MATERIAL. Civil Airways Map Chart of January 25, 1950.

GROUP V MATERIAL. Service "A" Manual, February 21, 1950, with four revisions; Service "C" Manual, August 8, 1949, Teletype Maps M-10, October 1, 1949, M-11, December 1, 1949, M-13, June 15, 1949, and M-14, April 15, 1950.

GROUP VI MATERIAL. Teletype Maps, Drawing M-56, August 15, 1950; Drawing M-58, January 5, 1949.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS. In accordance with directive from Hq USAF, Air Force bases which are inactive status and are listed in the Directory as "INACT - NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 90-15, unless on official business with written orders.

1/ CHANGES FOR PILOT'S HANDBOOK (EAST): (1) AL-188. Middletown, Pa., Olmsted AFB. Change bearing station to field to 115°.

(2) AL-290. NAS Norfolk, Norfolk, Va. Change initial approach altitude to: N crs 1500' intxn E crs LFI rng, W crs 1500' SE crs RIC rng. Procedure turn, S side E crs 1500' within 25 miles. Missed approach procedure. If visual contact not established within 2.9 mi after passing rng station, and landing not accomplished, climb and return to rng station. All turns to S to avoid conflict with Langley traffic.

(3) AL-552. Charleston (Kanawha Co. Arpt), W Va. Change initial approach altitude to N crs 2500' from int SW crs Parkersburg VAR; E crs min en route altitude, S crs from int SE crs HTW rng, 2500' from int E crs Charleston VAR; W crs 2500' from int E crs Huntington rng. Delete remarks. Show distance station to field (statute) 10.7 miles.

1/ CHANGES FOR PILOT'S HANDBOOK (WEST): (1) AL-193. Dallas NAS (Hensley Fld), Dallas, Texas. Change initial approach altitude to: S crs 1500' from ACT Range Stn, 1400' from Duncanville FMBW (Final). Low circling 1500'. Missed approach procedure: If visual contact not established at airport, climb straight ahead to 1500' or within 2.9 mi after passing Dallas Rng Stn, climb to 2000' on N crs of Dallas rng to rng, within 25 mi. If unable to maintain visual reference en route NAS Dallas, or if landing not accomplished, climb to 2500' on a heading of 211° and advise Fort Worth Approach Control. Fly visual contact from Love to NAS Dallas 9.4 mi, 211°.

(2) AL-434. Moffett NAS, Mountain View, Calif. Add to Remarks: Hold to 4000' northbound, descending southbound to cross intermediate cone at 2500'. Add remarks: Cinder butte 6437', approximately 2e4°, 3.5 mi from Head. High tension wires approximately 1.2 mile N of runway.

(3) AL-556. Bergstrom AFB, Austin, Texas. Change initial approach altitude for SE crs to 1600' from int W crs Richmond rng.

(4) AL-153. Enid, Oklahoma, Vance AFB. SE crs rdo rng has been realigned to 300° magnetic and toward station. Class of rng, MHLW-Z.

NAVY SPECIAL NOTICES

NAVY DATA. In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1946, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED. Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations is being discontinued.

CIVIL SPECIAL NOTICES

FLIGHTS INTO CANADA. No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in, or over, Canadian territory.

OMNIRANGE USE. The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

(9-12-50)

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post-deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 kc: All CAA airway communications stations other than these listed below discontinued receiving watch on 3117.5 kc July 1, 1950.

Clarksville, Pa.	38	Fayetteville, N. Y.	32	Wellesley Hills, Mass.	18
Clintonville, Pa.	41				

The above sites are all located in the First CAA Region. See Notices to Airmen for additional sites to be discontinued in the near future.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being published.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

✓ AIR ROUTE TRAFFIC CONTROL BOUNDARY AND FLIGHT ADVISORY BOUNDARY AMENDMENTS: Effective September 5, 1950, the Ft. Worth - Kansas City air route traffic control and flight advisory boundaries were amended as follows:

From a point 36° N latitude and 97° west longitude to a point 40 miles N of the Oklahoma City low frequency radio range station on Blue Airway 5, to a point 36° N latitude and 98° 20' W longitude, to a point 25 miles NE of Gage, Oklahoma, low frequency radio range station on Green Airway 4.

✓ MINIMUM EN ROUTE INSTRUMENT ALTITUDE AMENDMENTS: Effective October 1, 1950, minimum en route instrument altitudes are amended as follows:

	FROM	TO	MIN. ALT.
(1)	Green Civil Airway No. 2 is amended to read in part:		
	Buffalo, N. Y.	Rochester, N. Y.	2100
	Rochester, N. Y.	Syracuse, N. Y.	2100
(2)	Green Civil Airway No. 4 is amended to read in part:		
	St. Peters (INT), Mo.	St. Louis, Mo.	1800
	St. Louis, Mo.	Wood River (INT), Ill.	1800
(3)	Amber Civil Airway No. 6 is amended to read in part:		
	Mansfield, Ohio	Int. W crs Wellington, Ohio (VAR) and NE crs Columbus, Ohio	2600
	Int. W crs Wellington, Ohio (VAR) and NE crs Columbus, Ohio	Elyria, Ohio (Rbn)	2200
(4)	Amber Civil Airway No. 7 is amended to read in part:		
	Bedford (INT), Mass.	Boston, Mass.	1700
(5)	Red Civil Airway No. 9 is amended to read in part:		
	*San Diego, Calif.	El Centro, Calif. (Eastbound)	8000
	3000' - Minimum crossing altitude at San Diego, Eastbound		
	El Centro, Calif.	Barrett Lake, Calif. (FM) (Westbound)	8000
	Barrett Lake, Calif. (FM)	Jamel, Calif. (Rbn) (Westbound)	6000
	Jamel, Calif (Rbn)	San Diego, Calif. (Westbound)	3500
(6)	Red Civil Airway No. 11 is amended to eliminate:		
	Ardmore, Okla. (Rbn)	Tulsa, Okla.	2700
	Bedford (INT), Mass.	Boston, Mass.	1700
(7)	Red Civil Airway No. 13 is amended to read in part:		
	Franklin (INT), Mass.	Bedford (INT), Mass.	1800

(9-12-50)

(8) Red Civil Airway No. 21 is amended to eliminate:

1/ DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES AND REPORTING POINTS Effective 0001 E. S. T. October 1, 1950, unless otherwise specified, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS. (1) Red civil airway No. 11 (Tulsa, Okla. to Boston, Mass.) is amended by changing the caption and adding a first sentence to read: "Red civil airway No. 11 (Enid, Okla. to Boston, Mass.). From the intersection of the NW crs of the Enid, Okla. (Vance AFB) rdo rng and the NE crs of the Gage, Okla. rdo rng via the Enid, Okla. (Vance, AFB) rdo rng stn to the intersection of the SE crs of the Enid, Okla. (Vance AFB) rdo rng and the N crs of the Oklahoma City, Okla. rdo rng.

(9-12-50)

(2) Red civil airway No. 12 (Kansas City, Mo. to Philipsburg, Pa.) is amended by changing the caption and by amending the last portion to read: Red Civil airway No. 12 (Kansas City, Mo. to Williamsport, Pa.). . . . From the intersection of a direct line between the Windsor, Ontario, Canada, rdo rng and the Erie, Pa. rdo rng stn with the U.S.-Canadian Border via the Erie, Pa. rdo rng stn; Philipsburg, Pa. rdo rng station to the Williamsport, Pa. rdo rng stn.

(3) Red Civil airway No. 15 (Las Vegas, Nev. to Gila Bend, Ariz.) is amended by changing the caption to read: Red civil airway No. 15 (Las Vegas, Nev. to Phoenix, Ariz.), and by deleting the last sentence which reads: From the intersection of the W crs of the Phoenix, Ariz. rdo rng and the N crs of the Gila Bend, Ariz. rdo rng to the Gila Bend, Ariz. rdo rng stn.

(4) Red civil airway No. 29 (Rochester, N. Y. to Baltimore, Md.) is amended by changing the portion after "the Harrisburg, Pa. rdo rng stn" to read: to the intersection of the S crs of the Harrisburg, Pa. rdo rng and the W crs of the Baltimore, Md. rdo rng. From the Baltimore, Md. rdo rng stn to the intersection of the S crs of the Baltimore, Md. rdo rng and the SE crs of the Andrews, Md. rdo rng, excluding that portion which lies more than 2 mi E of the S crs of the Baltimore rdo rng. . . .

(5) Red civil airway No. 83 (Tucson, Ariz. to Rodeo, N. Mex.) is amended by changing the caption and by adding a first sentence to read: Red civil airway No. 83 (Gila Bend, Ariz. to Rodeo, N. Mex.). From the intxn of the W crs of the Phoenix, Ariz. rdo rng and the N crs of the Gila Bend, Ariz. rdo rng via the Gila Bend, Ariz. rdo rng stn to the Tucson, Ariz. rdo rng stn. . . .

(6) Red civil airway No. 95 is added to read: (Elmira, N. Y. to Utica, N. Y.) From the Elmira, N. Y. rdo rng stn to the Utica, N. Y. rdo rng stn.

(7) Blue civil airway No. 39 is amended to read: (Knoxville, Tenn. to U. S.-Canadian Border). . . . the Elmira, N. Y. rdo rng stn. From the Syracuse, N. Y. rdo rng stn. . .

(8) Blue civil airway No. 47 (Front Royal, Va. to Philipsburg, Pa.) is amended by changing the caption and by adding a last sentence to read: Blue civil airway No. 47 (Front Royal, Va. to Dunkirk, N. Y.). . . . From the Philipsburg, Pa. rdo rng stn via the Bradford, Pa. non-directional rdo beacon to the Dunkirk, N. Y. non-directional rdo bcn.

(9) Blue civil airway No. 72 is added to read: (Enid, Okla. to Wichita, Kans.) From the Enid, Okla. (Vance AFB) rdo rng stn to the intersection of the NE crs of the Enid, Okla. (Vance AFB) rdo rng and the N crs of the Oklahoma City, Okla. rdo rng.

(10) Blue civil airway No. 73 is added to read: (Brookville, Pa. to Buffalo, N. Y.). From the Brookville, Pa. non-directional rdo bcn via the Bradford, Pa. non-directional rdo bcn to the Buffalo, N. Y. rdo rng stn.

CONTROL AREAS: (1) Red civil airway No. 11 (Enid, Okla. to Boston, Mass.) CAPTION CHANGE.

(2) Red civil airway No. 12 (Kansas City, Mo. to Williamsport, Pa.) CAPTION CHANGE.

(3) Red civil airway No. 15 (Las Vegas, Nev. to Phoenix, Ariz.) CAPTION CHANGE.

(4) Red civil airway No. 83 (Gila Bend, Ariz. to Rodeo, N. Mex.) CAPTION CHANGE.

(5) Red civil airway No. 95 is added to read (Elmira, N. Y. to Utica, N. Y.) All of Red civil airway No. 95.

(6) Blue civil airway No. 47 (Front Royal, Va. to Dunkirk, N. Y.) CAPTION CHANGE.

(7) Blue civil airway No. 72 is added to read: (Enid, Okla. to Wichita, Kans.) All of Blue civil airway No. 72.

(8) Blue civil airway No. 73 is added to read: (Brookville, Pa. to Buffalo, N. Y.) All of Blue civil airway No. 73.

CONTROL AREA EXTENSIONS. (1) Control area extension (Presque Isle, Maine) is amended to read: From the Presque Isle, Me. rdo rng stn extending 5 mi either side of the W crs of the rdo rng to a point 15 mi W of the rdo rng stn and extending 5 mi either side of the NE crs of the rdo rng to its intersection with the U.S.-Canadian Border.

(2) Control area extension Philipsburg, Pa. is revoked.

(3) Control area extension Moline, Ill. is amended by changing word "northwest" to "west".

(4) Control area extension Enid, Okla. is amended to read: From the Enid, Okla. (Vance AFB) rdo rng stn extending 5 mi either side of the SW crs of the rdo rng to a point 25 mi SW of the Enid, Okla. (Vance AFB) rdo rng stn.

CONTROL ZONES. (1) The following 3 mi radius control zones are deleted: Whitehall, Mont: Whitehall Municipal Arpt; Cochise, Ariz: CAA Intermediate Fld; Drummond, Mont: Drummond Municipal Arpt.

(2) Fairbanks, Alaska control zone is added to read: Within a 5 mi radius of Eielson Air Force Base.

(3) El Toro, Calif: El Toro Arpt (5 mi radius) control zone is deleted.

(4) Moline, Ill. control zone is amended to read: Within a 5 mi radius of the Quad City Arpt extending 2 mi either side of the ILS lclzr crs to a point 16 mi W of the ILS lclzr.

(5) Augusta, Ga. control zone is amended to include a 5 mi radius of Bush Fld extending 2 mi either side of the SE crs and NW crs of the Augusta radio rng to a point 10 mi NW of the rdo rng stn.

(6) Fairbanks, Alaska, Eielson AFB control zone with extension is revoked.

(7) El Toro, Calif. control zone is added to read: Within a 5 mi radius of the El Toro, Calif. MCAS including the area within 5 mi either side of the N and S courses of El Toro rng between Amber 1, and Amber 2 and Green 5.

REPORTING POINTS. (1) Red civil airway No. 11 (Enid, Okla. to Boston, Mass.) CAPTION CHANGE.

(2) Red civil airway No. 12 (Kansas City, Mo. to Williamsport, Pa.) CAPTION CHANGE.

(3) Red civil airway No. 15 (Las Vegas, Nev. to Phoenix, Ariz.) CAPTION CHANGE.

(4) Red civil airway No. 71 is amended to read: (El Paso, Texas to Wichita Falls, Texas) Roswell, N. Mex. rdo rng stn; Lubbock, Texas rdo rng stn; Guthrie, Texas VHF rdo rng stn.

(5) Red civil airway No. 83 (Gila Bend, Ariz. to Rodeo, N. Mex.) CAPTION CHANGE.

(6) Red civil airway No. 95 is added to read: (Elmira, N. Y. to Utica, N. Y.) No reporting point designation.

(7) Blue civil airway No. 47 (Front Royal, Va. to Dunkirk, N.Y.) CAPTION CHANGE.

(8) Blue civil airway No. 69 is amended to read: (St. Louis, Mo. to Des Moines, Ia.) Quincy, Ill. non-directional rdo bcn; Ottumwa, Iowa non-directional rdo bcn.

(9) Blue civil airway No. 72 is added to read: (Enid, Okla. to Wichita, Kans.) No reporting point designation.

(10) Blue civil airway No. 73 is added to read: (Brookville, Pa. to Buffalo, N. Y.) No reporting point designation.

(11) Other Reporting Points is amended by changing Bass Intersection to read: the intersection of the SE crs of the Weeksville, N. C. (Navy) rdo rng and the western boundary of the New York Oceanic Control Area.

✓ ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established:

(1) Blackwell Intersection - the intersection of the NE crs of the Vance, Okla. rng and the S crs of the Wichita, Kans. rng.

(2) Capron Intersection - the intxn of the NW crs of the Vance, Okla. rng and the NE crs of the Gage, Okla. rng.

(3) Mulhall Intersection - the intxn of the SE crs of the Vance, Okla. rng and the N crs of the Oklahoma City, Okla. rng.

(4) Rushville Intersection - the intxn of the NW crs of the Cincinnati, Ohio rng and the W crs of the Wright-Patterson, Ohio rng.

(5) South Solon Intersection - the intxn of the E crs of the Wright - Patterson, Ohio rng and the NE crs of the Cincinnati, Ohio rng.

(6) Liberty Intersection - the intxn of the S crs of the Dayton, Ohio rng and the W crs of the Wright - Patterson, Ohio rng. (This intxn formerly named Trotwood.)

✓ DANGER AREA DESIGNATIONS: The following amendment is effective as dated unless otherwise advised:

AMENDMENT NO. 49 (September 12, 1950)

(1) A Big Delta, Alaska, temporary area is added to read: Location: Big Delta (WAC 77, 117); Description: Beginning at lat 63-56-00 N, long 145-40-00 W; due S to lat 63-38-00 N; WNW to lat 63-42-00 N, long 146-15-00 W; due N to lat 63-55-00 N; NE to lat 64-01-30 N, long 145-57-00 W; SE to lat 64-00-00 N, long 145-53-00 W; counterclockwise along the arc of a circle with a 5 mi radius centered at lat 63-59-40 N, long 145-44-00 W; to lat 63-56-00 N, long 145-40-00 W; point of beginning, excluding that portion overlapped by the permanent Big Delta danger area, and those portions which lie within civil airways. Altitudes: Surface to 60,000'. Time: Hours of daylight, 7 days a week. Using Agency: Arctic Test Branch, Army Field Forces, Big Delta, Alaska.

(2) The Big Delta, Alaska, permanent area, published on June 8, 1950, in 15 F. R. 3580, is amended by changing the "Using Agency" column to read: "Arctic Test Branch, Army Field Forces, Big Delta, Alaska."

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat.	Long.	Change in Weather Service
Groton, Conn. (Trumbull Arpt)	41°20'	72°03'	SW report to be available soon
Prescott, Ariz. (Love Field)	34°39'	112°26'	Pibal became available Sept. 11
Beaumont, Calif.	33°56'	116°56'	Pibal became available Sept. 11
Bakersfield, Calif.			Pibal discontinued August 30
Ozona, Texas			3-hourly report discontinued August 25.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ANNISTON ARPT: Ctn - strips being extended. (8-8)

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from ltl sunset to 0800 CST. (12-15) Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)

BROOKLEY AFB (MOBILE): Rnwy 14-32 clsd 0700-1600, Mon-Fri (const). (6-30)

**COURTLAND-BAY ARPT: Revised data. Correct lat 34-43-00, long. 87-16-00. (8-7)

CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)

EVERGREEN-MIDDLETON ARPT, SITE 20, MSY-ATL: Ctn - vehicles on fld intermittently. Rnwys, taxi strips being used as access road to adj ind. (5-30)

LANETT-VALLEY ARPT: NE/SW Strip clsd (const). (8-8)

MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng unreliable - use with ctn. (9-5)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot l mi S looks like arpt and lgts give impression of parallel rnwys. (1-17) Rnwy 8-26 clsd, installing lgtg sys. (8-8)

MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 11-29 inop. (9-5)

TUSCALOOSA-VAN DE GRAAFF ARPT: 30' lgtd gravel washer 400' E of E bndry. (7-25)

ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (6-27)

**PHOENIX-SKY HARBOR ARPT: Old Rnwy 17-35, recently used as taxiway, discontd for all purposes. (9-7) Use rnwys only. Ctl twr being erected approx 800' N of intsxn of Rnwy 12-30 and N/S Taxiway. Ctn - equip crossing taxiway. Rnwy 12-30 clsd. (6-23)

TUCSON ARPT: Rnwy 17-35 clsd. (7-19)

ARKANSAS: **BATESVILLE ARPT: 165' obst lgtd rdo twr erected 5.8 mi NNW (333°T) at lat 35-48-10, long. 91-41-04. (9-7) Const. Use N/S Rnwy only. (8-25)

BENTONVILLE ARPT: Strip under const. Use taxi strip for lndg. (6-28)

EL DORADO-GOODWIN ARPT: All rnwy lgts inop. (8-28)

FT. SMITH ARPT: Const W end E/W Rnwy. Use N/S Rnwy (8-28)

**HARRISBURG ARPT: 165' obst lgtd rdo twr erected 1.3 mi NE (55°T) at lat 35-33-47, long. 90-42-45. (9-7)

**JONESBORO ARPT: 233' twr erected 4.5 mi WNW (292°T) at lat 35-51-17, long. 90-43-40. (9-7)

LITTLE ROCK-ADAMS FLD: Ctn - rnwys under const. (9-11)

**MOUNTAIN HOME-MIDWAY ARPT: (New Fld). Lat 36-23-30, long. 92-27-15. (5-23)

**NEWPORT ARPT: 215' obst lgtd rdo twr erected 4 mi W (262°T) at lat 35-37-49, long. 91-15-08. (9-7)

**PARAGOULD-ALEXANDER FLD: (Revised data). Lat 36-06-30, long. 90-18-45. (7-14)

**SPRINGDALE ARPT: 154' obst lgtd twr Rdo Stn KBRS erected 2.5 mi NNW (346°T) at lat 36-12-14, long. 94-08-01. (9-8)

**STUTTGART-DOCKERY ARPT: 35' obst lgtd rdo twr erected on 165' bldg 2 mi SE (145°T) at lat 34-29-04, long. 91-32-32. (9-7)

CALIFORNIA: BAKERSFIELD-RADIO: Omnirng not usable between 90 and 130° from stn - scalloping. (6-20) About Oct 1, omnirng will be shut down until approx Oct 15. (9-9) About Sept 22, transmitting freq 126.7 mc will be discontd. (9-9)

BAKERSFIELD-KERN CO. #1 ARPT: When ctl twr inop tetrahedron will be free swinging. Rnwy 12-30 will be lgtd. (8-5)

BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. NE/SW, E/W Strips clsd. (5-30)

BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3)

**CALEXICO-INTERNATIONAL ARPT: Top of 181' twr Rdo Stn KICO erected 2.5 mi NNE (22 T) at lat 32-41-58, long. 115-30-10. (9-9)

CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.

CAMARILLO-RADIO: LF rng on 359 kc S crs displaced 3° E. (8-1)

CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)

COALINGA ARPT: NW/SE and NE/SW Rnwys clsd (const). Equip on fld. (7-3)

**COTATI OLF: Correct lat 38-20-45, long. 122-43-15. (6-12)

CRESCENT CITY-DEL NORTE CO. ARPT: Taxiway W end E/W Rnwy clsd (drifted sand). Use rnwy for taxying. (6-18)

EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont ' fld. (8-3)

EL CENTRO NAAS: Const on rnwys. (3-20)

EL TORO MCAS (SANTA ANA)-TOWER: Navy GCA oper for emerg only. (8-31)

FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop. (7-1) FLD: N/S Rnwy clsd. (6-20)

FRESNO-RADIO: Omnirng on 112.9 mc shut down until approx Nov 11. (9-11)

RADIO FACILITY CHARTS

For dates of latest prints of Radio Facility Charts see separate "Check List for Dates of Current Radio Facility Charts", published bi-weekly for distribution with these charts. It may also be obtained free, upon request.

PLANNING

AP 9	June, 1949	3060d	Sept. 16, 1949	3069a	Aug. 17, 1949

AIRCRAFT POSITION CHARTS

3071	North Atlantic	July 13, 1950.	3072	Western Europe and Africa	Mar. 24, 1950.	3073 Caribbean Sea April 27, 1949.

ROUTE CHARTS

RC 2201	Chicago to Gander	Sept 28, 1949	RC 2203	Northeast United States	Mar. 22, 1950	RC 2208	Gulf to Great Lakes	Dec 16, 1949
RC 2202	Northwest United States	Mar. 13, 1950	RC 2204	Western United States	June 16, 1950	RC 2230	Ireland to Italy	Feb. 10, 1950
			RC 2206	Southeast United States	Jan. 6, 1950			

(9-12-50)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Elko	Los Angeles	San Francisco	WAC 522
El Paso	Mt. Whitney	WAC 406	FC 178
Grand Junction	Roswell	WAC 407	FC 228
Klamath Falls	Sacramento	WAC 469	

On August 28, 1950, it was reported in error that a New Edition of Miami local would be published soon. The notice should have read that a New Print would be published.

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NEW EDITIONS

Beaumont	8-6-50	AL 753		Wailuku, Maui	8-18-50
Birmingham	8-4-50	AL 134	ILS	El Paso	8-20-50
Chattanooga	7-26-50	AL 330	ILS	South Bend	8-20-50
Mobile	8-6-50	AL 432	ILS	Tulsa	8-20-50
New Orleans	8-6-50	AL 516	ILS	Raleigh	8-20-50
Orlando	7-30-50	AL 627	ILS	Reading	8-20-50
WAC 466	7-23-50	AL 638	ILS	Akron	8-20-50
WAC 525	7-23-50	AL 655	ILS	Covington	8-20-50
ADF	7-5-50				
Atlanta local	8-3-50				
Washington local	8-1-50				
FC 4	8-2-50				
FC 175	7-13-50				
FC 230	7-11-50				
FC 231	7-26-50				

DROPPED CHARTS

ILS 304, 652.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Automatic Direction Finding approach charts, 5 cents each, by number with prefix (ADF); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.
